

1 Cognizant Azure DataHyperloop Solution

Accelerate your DataOps Journey with a Proof of Value Engagement

Cognizant Azure DataHyperloop DataOps Solution: Robust, scalable and repeatable approach to building an enterprise scale DataOps foundation

Cognizant simplified Azure DataHyperloop DataOps solution is an automated, process-oriented methodology that brings together data stakeholders focusing on Agile process controls, deep integration of data tool stacks, and the orchestration of repeatable and reusable data pipelines — all paired with continuous delivery and continuous monitoring principles to help organizations automate and streamline data delivery for all their analytics requirements.

Get Started with Cognizant DataHyperloop Solution Proof of Value

In this engagement, our DataOps experts will work with you to assess your current infrastructure, showcase the benefits of our solution and leave you with a roadmap to automate and streamline your data pipelines at scale.

Assess

Analyze current state, understand objectives and provide a customized DataOps roadmap best suited for your enterprise.

Scope

Outline the project scope and define cost and timeline.

Design & Configure

Leverage Cognizant's DataOps Framework to create a reference architecture and configure data pipelines for Analytics.

Review & Next Steps

Socialize insights with the leadership and share a roadmap to move from Proof of Value to production scale.

Cost: \$10k - \$70k

Duration: 8 Week – 12 Week
