

Modernise your Intranet

What's it about?

Microsoft Viva Connections is your gateway to a modern employee experience – get ready to inform, engage and empower your organisation. A modern SharePoint Online intranet is the key dependency for Viva Connections.

We've designed 'Modernise your Intranet' specifically for organisations to unpack the state of their current intranet and guide them to transition their intranet to SharePoint Online as the first step on the road to implementing Viva Connections. During this engagement, we will:

Analyse and design

We'll review your existing intranet and integrations to understand where you are now, and where you want to be. Our consultants will design a modern architecture and develop a migration strategy based on your requirements. Additionally, we'll review your existing governance documentation.

Implementation and migration

Our consultants will go on to design and build the key structures of your SharePoint Online intranet (home site and homepage, some IA structures). Our content expert will then migrate up to 50 pages to SharePoint Online ensuring you have a solid set of content to demonstrate progress.

Develop change and adoption plan and training

Our Adoption specialists will design a change and adoption strategy and supporting plans. We'll create supporting training and communication collateral and execute SharePoint Online author training ensuring your staff are confident to author engaging content.

"Engage Squared were pivotal to shaping our ongoing strategy, and with their help and expertise they helped us change our thinking. Engage Squared were fundamental in helping us to think in a different way, to help us achieve a very successful outcome for the business."
