

AZURE DATA CENTER MIGRATION SERVICE

It's been said that the on-premise data center has no future.

Like mainframes and dial-up modems before them, self-hosted data centers are becoming obsolete.

Most organizations are having to transform themselves in this new digital age and as a result business is putting more and more pressure on IT to:

- Create efficiencies by streamlining processes to get work done faster or with less resources
- Change and scale fast enough to keep up with business needs and requirements
- All while reducing the cost of IT licenses or operations

By partnering with BUI, we can help your organization on this journey with our Azure Data Center Migration Service

This offering includes the following deliverables:

- 1 Cloud Readiness assessment against IT environment
- 2 A roadmap outlining a strategy for the successful implementation of cloud in your organization
- 3 Hybrid Architecture implementation
- 4 24 x 7 Support for your IT team during the migration process

Costs

US\$ 50 Per Server / Month

Minimum 10 Servers

12 Month Contract
