

MICROSOFT AZURE EXPERT MSP + GOLD SECURITY PARTNER

What We Offer

At BUI, we use digital technology in new and powerful ways to create customized IT solutions that enable performance and productivity in a changing world.

As a long-standing and award-winning Microsoft Gold Partner, we're proud to provide specialist guidance and industry-leading support to organizations utilizing the Microsoft suite.

CLOUD

Our capabilities include Virtualization, Private Cloud, Microsoft Azure, Microsoft Office 365 & Microsoft's Enterprise Mobility and more.

MANAGED SERVICES

BUI Managed Services from cloud adoption to managed infrastructure, operations, monitoring and support.

SECURITY

BUI is the first Microsoft Partner to hold a Microsoft Gold competency for identity and security in Africa. We take Security very seriously and launched our Cyber SoC early 2020.

ISV

From on-premise to the cloud, BUI delivers on technology investments encompassing all aspects of modern datacenters.

Introduction

BUI's Cyber Security Operations Center (SoC) offers dedicated skills, focusing on real-time analysis of security alerts.

Providing a birds-eye view across your enterprise

Watch our 60 second video on YouTube to get an overview

The BUI Cyber SoC monitors your entire IT security landscape, including On-premise, Cloud, Devices, Applications, Networks, Infrastructure and Users.

The BUI CyberSOC provides a comprehensive and specialized Managed SOC service which runs on Microsoft Security technology, powered by modern Artificial Intelligence (AI) based infrastructure, which provides full security services around Compliance Reporting, Database, Infrastructure, Access Monitoring, Real-time Threat Monitoring and much more.

Managed and monitored by highly skilled cyber security professionals provided to you, as a service with near to no infrastructure requirements.

For a full range of services visit our website.

Overview

BUI Cyber SoC is ideal for any organization that is looking to reduce security breaches and improve threat detection.

Invest in security, not infrastructure

The BUI Cyber SoC provides a proactive 24/7 managed security service backed up by powerful AI based Cloud Technology with dedicated skills focusing on real-time analysis security alerts.

With committed resources and highly scalable AI detection pattern matching to reduce noise and enhanced analysis for your unique security landscape.

Never again let a storage limit or a query limit prevent you from protecting your enterprise. The nature of our service allows your organization to eliminate infrastructure costs by automatically scaling your resources in a for-use consumption model, allowing you to scale as required.

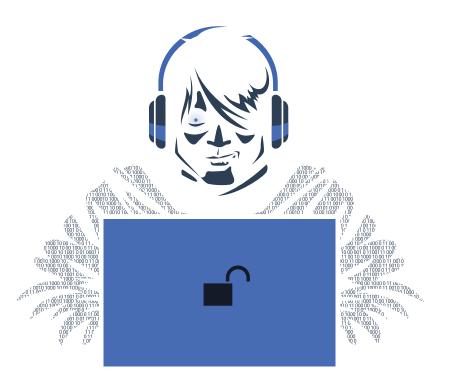

Features

Reduce infrastructure costs by automatically scaling resources and only paying for what you use.

Simplified SecOps for faster threat response

Our consultants are dedicated to the management of the BUI Cyber SoC by providing highly skilled cybersecurity resources to manage our world class infrastructure, the BUI Cyber SoC is backed-up and protected by globally available Microsoft Security Technology in your region.

- Detection
 Threat detection is smarter and faster
- Reducing Noise
 The focus is on finding real threats, daily, and minimizing false positives
- Custom
 Pre-built queries based on years of security experience

Patterns
Previously uncovered
threats can be detected

Technology
Built-in machine learning backed
by world-class Microsoft Technology

Analysis
BUI's SoC provides monitoring and
alerting and, if enough data is collected,
an analysis of the attack.

Features

Reduce infrastructure costs by automatically scaling resources and only paying for what you use.

Simplified SecOps for faster threat response

Incident Response

Identify Threat and Contain

- Identify all threat activity and attribution
- Minimise impact through (automated) containment run books

Detection

Investigate and Triage

- Swift analysis of surfaced security events
- Triage and escalate potential threat activity or close false positives
- Tune detections to focus on real threats

Configuration

Implement and Maintain

- · Service design based on Use Cases
- Core platform implementation and integration
- Continual improvement driven from SOC activities and Threat landscape

Vulnerability Mgmt

Scan and Report

- Identify infrastructure vulnerabilities
- Prioritise remediation and report

Monitor for Deviations

- Implement security configuration baselines on infrastructure
- Detect and respond to configuration deviations

Threat Hunting

Proactive Threat Detection

- Researching threat attack methods and resulting indicators
- Proactively hunting for threat activity across disparate data sources

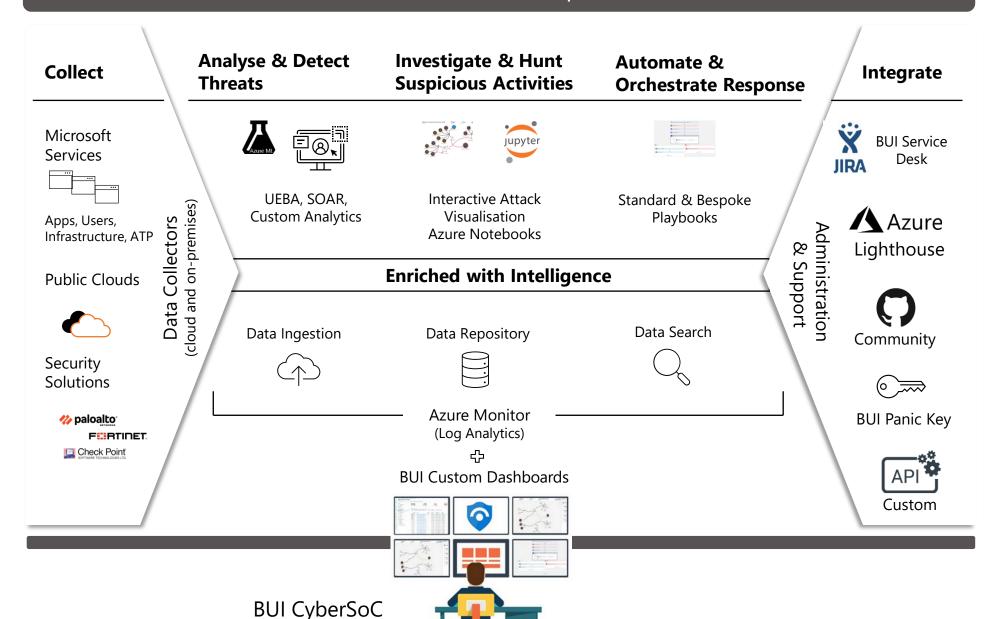

Solution Architecture

Cloud based architecture using Microsoft Sentinel, enriched with BUI playbooks & analytics, custom dashboards, integrations and supported by the BUI SecOps team.

Cloud based architecture for quick enablement

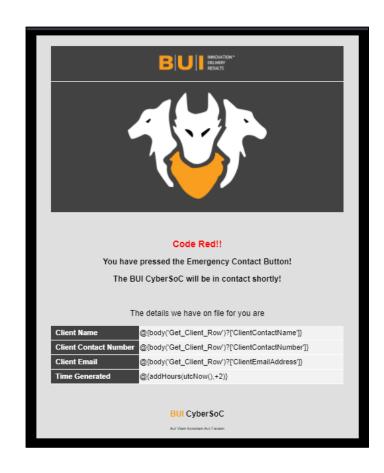

Solution Architecture

Cloud based architecture using Microsoft Sentinel, enriched with BUI playbooks & analytics, custom dashboards, integrations and supported by the BUI SecOps team.

BUI Panic Button

The BUI Panic Button is a Value-Added Service for our managed customers, which launches a contact request with our CyberSoC. The solution is delivered via API and Logic Apps functionality.

How is this billed

The BUI Cyber SoC is billed based on the service tier you select. Service tiers provide basic to premier managed cybersecurity services and is based on cloud technology, providing virtually unlimited capacity.

Our Pricing Model

We offer the BUI CyberSOC Service in four packages which are billed monthly as a fixed service fee

All Subscriptions benefit from these features:

- No Software costs
- Dashboard Access
- Custom detection & automation
- Programmatic remediation
- Infinitely scalable
- Al based analytics
- Up to 90 days data storage included
- Proactive real-time alerting
- Custom and policy-based detections
- Correlated analysis of billions of security events
- Flexible 8/5 or 24/7 monitoring (*Package dependent)
- Location independent
- Highly secured physical facilities

Bronze

Business hours

Free 90 Day storage 8/5 monitoring
