Commercial Printer

Businesses that are Commercial Print Manufacturers generally own Offset Sheet Presses or Digital Sheet Presses and print on Paper substrate to produce various products. Commercial print products are usually magazines, brochures, posters, business cards, postcards and the like. After printing additional operations like stitching, cutting, gluing, embossment, foil and many others might be required. Commercial Printing is the most common print manufacturing in North America.

Most commercial printers are job shops, doing one-off production. Larger or specialty printers might require fulfillment and warehousing and often printers add kitting and other value added operations to increase margins and service offerings. You buy paper to the job in most cases. You need to process many estimates. You often are shipping many deliveries to many locations, sometimes off the same order but often for different orders.

PrintVIS Implementation and Training Prices

Bronze

You are a small commercial printer—probably using a digital press. You produce a mix of wide format and standard commercial products.

You do not want manufacturing shop floor control and will schedule only based on delivery date. You do want accounting, estimating, purchasing control. You will record quantities produced but only use the estimated times and materials for job costing.

This is recommended for smaller (under 15 employee) Commercial Printers with 1-2 presses and 8-10 pieces of finishing equipment.

\$32,500 USD

Fixed Fee Implementation

No significant customizations are supported in Bronze projects. Customers must upgrade to Silver or Gold in those cases. No ISV / 3rd Party Addons will be used.

Silver

You are a small-mid size commercial printer—probably using offset and digital presses. You produce a mix of wide format and standard commercial products.

You do want manufacturing shop floor control with full accounting, estimating, and purchasing control. You will schedule your floor based on your estimated times, record materials used and time spent on the shop floor.

This is recommended for mid size (under 30 employee) Commercial Printers with 2-4 presses and 10-20 pieces of finishing equipment.

\$55,500 USD

Fixed Fee Implementation

Minor customizations are supported in Silver projects. Customers must upgrade to Gold for more customization. None or 1 3rd Party Addons might be used.

Gold

You are a mid size commercial printer—using offset and digital presses. You produce a mix of wide format and standard products and/or high precision/complex products.

You want the Silver level plan with extras:

- Kitting and Assembly
- Job Ganging
- Fulfillment and Warehousing
- Full CRM Functionality
- Document Management in PrintVIS

This is recommended for mid to large size (under 60 employee) Commercial Printers with 5+ presses and 20+ pieces of finishing equipment.

\$84,500 USD

Fixed Fee Implementation

More complex customizations are supported, but the cost of customizations must not exceed 15% of the total cost. 2 or more 3rd Party Addons might be used.

Platinum

You are a larger commercial printer—using offset and digital presses. You produce a mix of wide format and standard products and/or high precision/complex products.

You want the Gold level plan with extras.

- You will use Warehouse Management (wifi).
- You want a Power BI starter dashboard
- You will use complex scheduling.
- You purchase to stock
- You want to use Warehouse Barcoding software

\$102,500 USD

Fixed Fee Implementation

Any degree of customizations are supported. Any number of 3rd Party Addons might be used. On-Site time is limited with most delivery being remote.

Monthly: \$120/user per Month during training

Fixed Fee projects require customers also purchase monthly project support during the term of the project for the target number of full users expected to go-live with the system
