SAP on Azure

Need to decrease hardware spend by moving SAP workloads off premises? Ready for an upgrade to S/4HANA?

No matter the business driver, Blue Chip Consulting Group, a Core BTS company, has the knowledge and expertise to help you replatform SAP to Microsoft Azure.

Using SAP best practices, we have developed custom programs and tools that drive the effective and automated migration of SAP workloads to Azure.

Together with Microsoft and SAP, we provide you with a holistic solution that includes architecture guidance, design documentation, configuration assistance, and migration support.

As a result, you will be left with an SAP environment that offers increased agility, security, and business continuity.

Our Methodology

We help you prepare for the ever-changing SAP landscape by using first-hand experience, best practices, and a team of certified consultants.

• Determine Azure governance and architecture strategy

• Build out foundational Azure components

• Develop SAP environment utilizing an established deployment methodology

• Run testing to determine SAP environment stability and security

• Calibrate and iterate the SAP environment

• Deliver Azure As-Is documentation and begin migrations

By following our methodology, you can experience seamless and repeatable migrations into a secure and optimized Azure environment
