Microsoft 365 Security Briefing

A tailored planning engagement targeted at ensuring your Microsoft 365 cloud security solutions are aligned with your needs.

PURPOSE

Most organizations struggle on their journey to the cloud to realize the value to their user organization. Questions from not only where to start but where to go next are common. As a result, many aren't taking advantage of the solutions they've purchased nor seeing the adoption levels expected from their business community. The purpose of this briefing is to review Microsoft 365 capabilities and the Microsoft Threat Protection stack.

WHAT'S COVERED

This 1-2 day workshop is to accomplish the following:

- Overview of Microsoft 365 and what's new
- Develop use cases for deploying workloads in groups (ex: Exchange Online, OneDrive, and Teams)
- Enable a Zero Trust security methodology by deploying the Microsoft Threat Protection stack
- Identify the risk to dark data with M365 compliance tools

END RESULT

At the end of this engagement, Netrix will provide a actionable roadmap, business value overview, and next steps.
