

Proximus - IoT Accelerator

Gaining Business Value out of the Internet of Things

Key Objectives

Discover what your Key Objectives are to move into the IoT ecosystem

AS-IS Overview

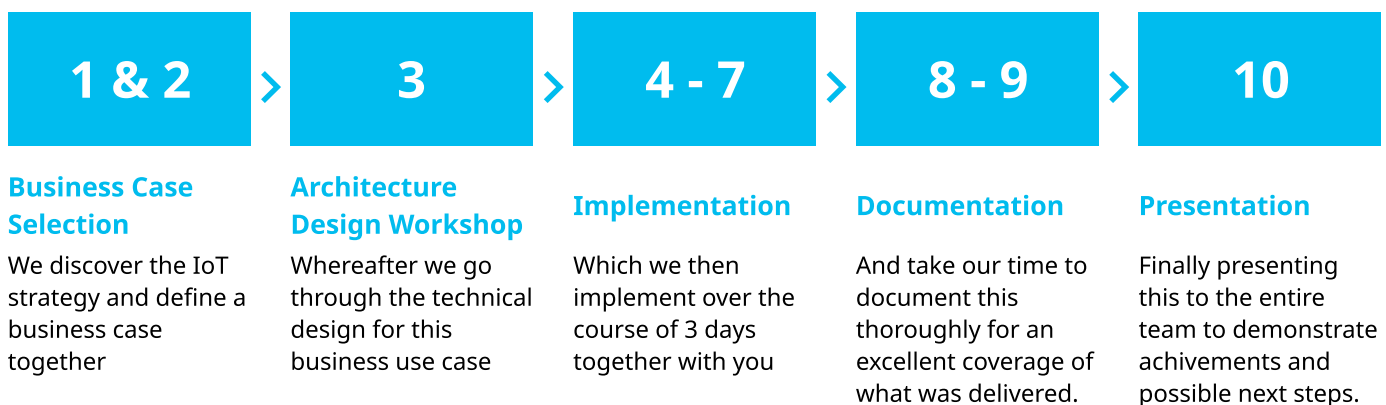

Get a high level overview of your current AS-IS state

Impact vs Effort

Measure how much effort you will have to do to realize the impact

- **Enable critical deployment and updates** to be sent centrally to the cloud and downloaded remotely during partial connectivity windows.
- **Use real-time monitoring and data intelligence at the edge**, and receive alerts about anomalies, even when offline
- **Enable connectivity with built-in security features** through innovative gateway technology and Azure IoT Edge.
- **Analyze performance on location**, even when disconnected, with machine learning algorithms at the edge.
- **Use data-drive decision-making to predict and prevent issues** based on advanced analytics and artificial intelligence - ultimately improving operating efficiencies, run-time and length of service of your remote equipment.
- **Remotely monitor, manage, and maintain equipment across multiple sites** from a central location.

About Proximus

Proximus is a provider of digital services and communication solutions operating in the Belgian and international markets. We offer products and services adapted to each customer and we are the partner of citizens, businesses, and Belgian society in their digital evolution. The customer is at the heart of everything we do. Our aim is to deliver the best customer experience and to simplify the customer journey by offering accessible and easy-to-use solutions.
