

Azure Virtual Desktop POC

Microsoft Azure Virtual Desktop

Enable a secure, remote desktop experience from anywhere.

Every organization now has a remote work culture. Enabling a work from anywhere, anytime, on any device model makes it easier for employees to be productive and effective each day; however, even the most prepared IT team can be challenged with the effort to provision the necessary hardware and software, provide training and ongoing support, and ensure security and compliance to keep at-home workers productive.

If you are interested in taking the first step towards gaining the advantage of Azure Virtual Desktop (AVD) benefits, then Infotech can help you get started with our Proof of Concept (PoC). Our AVD PoC helps you to get a fast and reliable first experience with Azure Virtual Desktop based on your own needs and applications. Contact our sales team to book your slot.
