What is the Power Platform?

The 'Power Platform' is a collective term for three Microsoft products: Power BI, PowerApps and Power Automate (previously known as Flow). Combined, these three low-code/no-code capabilities provide users the direct ability to quickly and adaptively craft forms, workflows, and reports, that can improve market agility, reduce the load on IT support of vendors, and empower users to create their own unique solutions that are best suited for both the work style of a team as well as their desired timelines.

Why is the Power Platform so important?

PowerApps = Forms and Applications

PowerAutomate = Workflows and Automation

PowerBI = Visualization and Intelligence

Democratization = Empowers business users to leverage technology, without the need for IT help

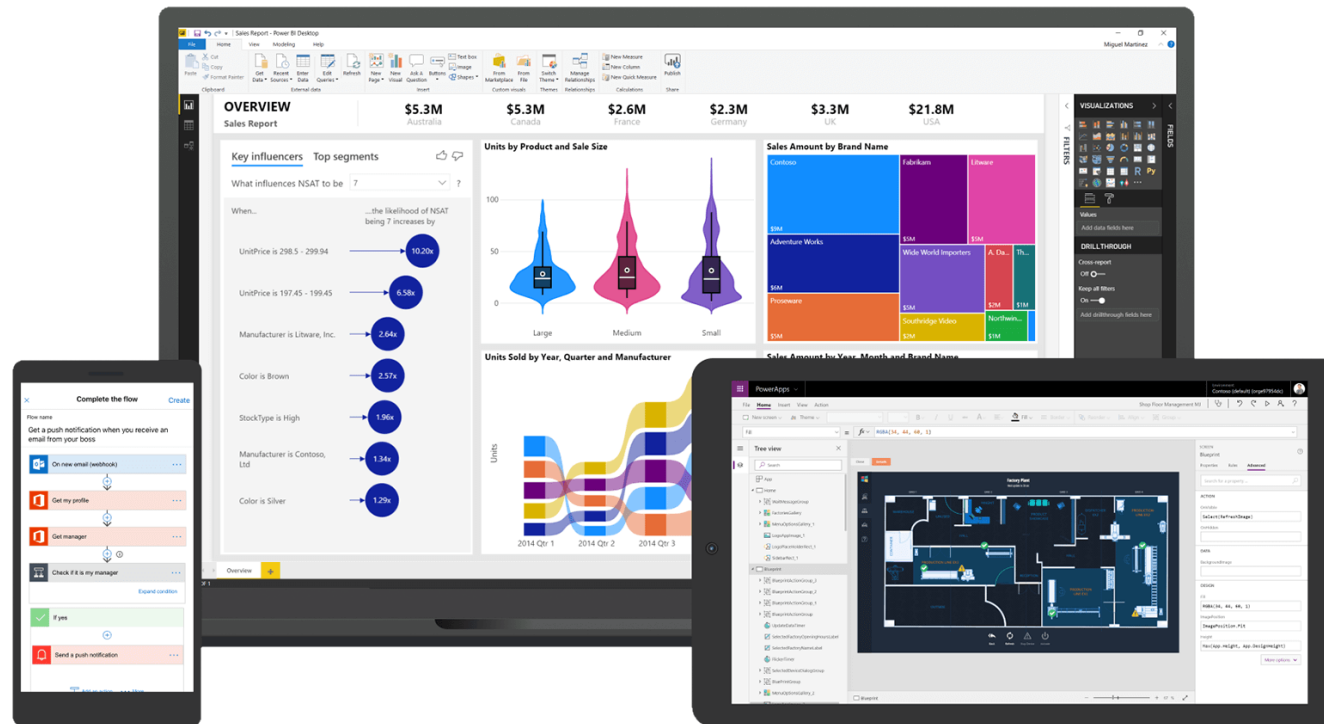

Emergent Capability = Completes and extends M365/D365, there by allowing the business to create things IT would never have even considered

Innovation/Adaptability = The business can be as creative as is needed, and can change the solution as their needs change with time

Competitive Advantage = Allows business users to seize market opportunities and implement new efficiencies much faster

Microsoft

POWER PLATFORM

Low Code Application Platform Magic Quadrant

“Enterprise low-code application platforms deliver high-productivity and multifunction capabilities across central, departmental and citizen IT functions.”

“By 2023, over 50% of medium to large enterprises will have adopted an LCAP as one of their strategic application platforms.”

-Gartner

What are Governance and Adoption

Governance

"How we use it productively as an organization"

Adoption

"When and why to choose to use it as a team or individual"

Delivering the right content and messaging, at the right time enables productivity, reduces support burden, and drive productivity (overall ROI).

Enablement Empowerment through Content

Makers (Power Users)	Pro Developers	IT Admins
QuickStarts / How-To Guidance	Tool selection criteria	Roles & Responsibilities
Tips & Tricks	Patterns & Practices	Platform Administration
Guided training access	Key Microsoft Resources	Monitoring Data Compliance
Peer support (Champions) and Helpdesk access	Integration into org processes	Measuring Platform Adoption
Information Management Guidance	Maintenance / Upgrades	Enterprise Features (MS starter-kit, App catalog, PowerBI reporting)

All content is stored and delivered through the establishment of a Power Platform COE (Center-of-Excellence) Site using the Netwoven provided materials, template, and configured for your specific needs.

Netwoven Power Platform Enablement Offering

Power Platform Adoption Assessment

- Introduction call and interview
- Assessment and Journey Recommendation(s)

Power Platform Journey Workshop

- Engages stakeholders, educates
- Strategy, Planning, Timelines
- Sets goals and success metrics
- Marketing/Communications Examples
- Champion Engagement / Events
