

Guarantee the continuity of your business with a solution which facilitates employee mobility

With Windows Virtual Desktop, access your desktop and applications anywhere, with the flexibility to work outside the office and the security of being protected at all times.

WINDOWS VIRTUAL DESKTOP BENEFITS

All employees can connect securely with their own corporate username and access their Windows 10 desktop or their business applications to work from anywhere, from any device.

Now managing virtual desktops couldn't be easier and IT administrators can benefit from a lighter workload.

Access to Windows 10 desktops, corporate applications and hold Teams meetings (calls / video calls) in addition to all the collaboration and productivity features.

Monthly payment, free of hardware costs and with the latest Software.

¿WHAT DO OUR CLIENTS SAY?

"Because 90% of our computers are desktop, the implementation of these virtual desktops has been carried out in the personal computers of our employees, who have shown their outstanding commitment and predisposition to this new reality of remote work, which, in our case, is here to stay "

– Pryconsa, Responsable técnico ITCS, Pryconsa
