

MIGRATE FROM DYNAMICS GP TO DYNAMICS 365 BUSINESS CENTRAL

Using the Sikich HeadStart Dynamics GP to Dynamics 365 Business Central migration package, move your data to the cloud quickly and efficiently.

STEP TO MICROSOFT DYNAMICS 365 BUSINESS CENTRAL TO:

- **Improve Security and Enable Compliance:** Staying on-premise could put you at a higher risk for security breaches and non-compliance. The Microsoft cloud technology delivers end-to-end protection with insights into global cyber threats and capabilities that you can't provide yourself on-premise.
- **Reduce Costs:** The cloud technology helps you deliver a more cost-effective solution than what you could provide on-premise by eliminating hardware costs, reducing administration costs, and retiring third-party products.
- **Agile and Current:** Increase your business's agility, ability to stay current, scale, and roll out new capabilities quickly. If you are on old, unsupported systems, you also risk non-compliance with newer regulations.
- **Advanced Analytics for Deeper Insights:** Access, model, and analyze data across multiple dimensions to perform ad-hoc, customized reporting. Use Microsoft Power BI to create highly compelling dashboards. Combine big data, predictive analytics, and Internet of Things to transform all information sources into more actionable intelligence.
- **Looks and Feels Like Office:** Get the same familiar interface as the Office tools you already know, like Outlook, Word, and Excel. Dynamics 365 Business Central is a comprehensive, yet easy-to-use solution—and less training time means quicker adoption for employees.

READY TO MIGRATE? HERE IS HOW THE HEADSTART IMPLEMENTATION WORKS:

- Sikich will stream-line the data migration process.
- Sikich will configure Business Central based on out-of-the-box, ready-to-use functionality for one GP company to get your business up and running.
- Sikich will deploy one PowerBI financial dashboard for financials for your accounting departments access to real time data analysis.
- Take part in Sikich's two-day Jet Reports workshop to configure your new reporting tool, receive training on report creation, and assistance testing the software.
- Sikich will setup of one sandbox or additional testing company.

All this for within an 8-week, fixed bid implementation of \$30,000.

Reach out to your Client Account Manager or Info@Sikich.com today for more information.

IS YOUR GP ENHANCEMENT RENEWAL COMING DUE?

Take advantage of the Dynamics GP Enhancement to BC renewal dual-use license promotion:

- Must be a Dynamics GP on-premises customer paying an annual enhancement fee
- Offer available from June 1, 2020 to June 30, 2021
- Must have an active Enhancement Plan subscription, and can apply for the offer 30 days prior to renewal date expiration
- Must commit to at least one year, with the option to renew for up to a three year term

BENEFITS

- Reduce cloud costs with a 60% discount on Business Central Cloud Users
- Allows for dual-use rights and downgrade rights to the current Dynamics GP version
- Continue to use the current on-premise application while you transition to your Dynamics 365 Business Central (Cloud) solution
- Continue receiving full Enhancement Plan benefits for Dynamics GP
- If you have already budgeted for Dynamics GP annual enhancement plan renewal, you can use this to also access cloud licenses
