OKTA TO AZURE AD MIGRATION

Organisations currently using the Okta platform for application integration want to simplify authentication and reduce costs with a move to Azure Active Directory (Azure AD) – but many share uncertainties around how to begin their migration journey.

Previously, businesses have opted to use Okta as an alternative cloud identity provider to Active Directory Federation Services (ADFS). Unfortunately, this meant unsuccessful integration with Office 365, leaving them with multiple identity providers and additional services costs.

By consolidating identity providers, organisations can save money and streamline integration with Office 365. In addition, benefits such as seamless single sign-on become available – a feature that's only accessible on-premise with Okta. Organisations can also utilise Azure functionality such as session control, conditional access, and enhanced security.

SOLUTION OVERVIEW

ITC Secure's Okta to Azure AD migration service begins with an initial workshop to gather information about your key systems. We then create a tailored plan for staged application migration from Okta to Azure AD based on risk and priority. We work alongside you so you can learn how it's achieved along the way. After the application work, we migrate to Azure AD as the primary identity provider and (if needed) defederate and decommission Okta. You will receive a full supporting documentation of the work completed.

The result is an integrated and streamlined environment where access to any application is managed for every employee, customer, and partner, across a hybrid infrastructure, with single sign-on and associated cost savings.

KEY FEATURES AND BENEFITS

Managed Access
- Manage access across hybrid environments
- Add Azure session control and conditional access
- Enhanced security and response capabilities

Simplified Authentication
- Consolidate identity providers
- Establish single sign-on
- Application migration to Azure AD

Cost Reduction
- Move away from a redundant vendor
- Reduce support and licensing costs
- Okta defederation and decommission

Seamless native integration between Office 365 and Azure AD

Seamless single sign-on and Azure AD

Better authentication and cost reduction

Documented application migration to Azure AD

WHY ITC

ITC Secure is an advisory-led cyber security services company.

We have a 25+ year track record of delivering business-critical services to over 300 blue-chip organisations - bringing together the best minds in security, a relentless focus on customer service and advanced technological expertise to help businesses succeed.

With our integrated delivery model, proprietary platform and customer-first mindset, we work as an extension of your team throughout your cyber journey and always think not only about you, but also your customers and the reputation of your brand.

ITC Secure is headquartered in London, UK. With a dynamic balance of the best in people, technology and governance, we make cyber resilience your competitive advantage.
