

Security Immersion Experience

Security in a cloud-first world

Data is accessed, used, and shared on-premise and in the cloud—erasing the traditional security boundaries. You need technology that protects you against evolving threats. Microsoft technology secures your digital transformation with a comprehensive platform, unique intelligence, and partnerships.

Stay secure, enhance productivity

Knowing that your time is valuable, we have developed a true to life, hands-on, interactive session designed for professionals like yourself—Security Immersion Experience (SIE). It is a facilitated hands-on session to test-drive Microsoft devices and solutions through simulated, every security scenarios.

Participate in a SIE

During an Immersion session, you and a handful of colleagues will experience the true impact of being a Microsoft-secured organization. We will provide a skilled facilitator to walk you through security scenarios using the latest Microsoft online services and some of the newest devices on the market.

What a Security Immersion Experience can do you for your organization:

A CIE trained facilitator will walk you through security scenarios. Here is what to expect:

- **No slides, demos, or sales pitch**
 - It's interactive, experimental, and fun
- **Custom sessions for participants**
 - Based on your interest, priorities, & needs
- **Learn best practices to secure your data**
 - Keep documents & communications secure

Each session is unique and typically lasts 1-3 hours. Here is what you will experience:

- **Understand modern threats**
 - Help your users avoid common pitfalls
- **Protect your users identity**
 - Learn secure ways to authenticate
- **Work securely while being productive**
 - Secure data without inhibiting workflow
