

# Agenda Data Platform Assessment

## 2 - weeks Proof of Concept with Techedge Consultant

### Day 1

- Our technical consultant will brief you about the scope and high-level details of setting up Azure Synapse with Power BI

### Day 2 - 6

- Set up the Azure Synapse environment and work with your team to gather data for the pilot data warehouse
- Onboard datasets to build appropriate data models
- Configure Azure Synapse in your environment to test and train the model

### Day 7 - 9

- Build 1–2 Power BI views by onboarding the key insights that were generated

### Day 10

- Create a roadmap based on the data and insights generated by the pilot
