

The bridge between IT Operations and Software Development

Azure DevOps Services

Telelink Business Services is the biggest and most modernized System Integrator in Bulgaria and one of the biggest in the region. We provide end to end Data Center and Cloud Services. Our services cover the whole IT and we are one of the few who provide end-to-end Managed Services in compliance with Enterprise's best practices.

WHAT WE OFFER

Our DevOps services make the bridge between IT Operations and R&D. We take care about architecture, security, financials and compliance, while automating the client's Development processes and bringing cutting edge technologies to the developers.

We are utilizing heavily the Azure DevOps Services, together with Azure Kubernetes Services and Log Analytics. We enrich our services with open-source software, running on containers for extensive analysis and overall better value for the customer.

Our DevOps services are a in a hybrid Consulting/Managed Services model. After estimation we provide a packaged solution, which is aiming to solve particular issues faced by our customers. We are flexible and easy to work with.

We are heavily utilizing Azure DevOps, Log Analytics and all Azure Container services. We are bringing our own containers with Prometheus, Grafana and Elk Stack, when needed to meet customer expectations. All that runs on Microsoft Azure.

WHAT OUR CUSTOMERS ARE SAYING

"Telelink Business Services's DevOps solutions, helped the backbone of our Platform by providing a great scalability and availability when we need it, while significantly reducing the release cycle for each deployment we have. Thank you!"

Microslav Gechev, CEO, Develiot, MS Partner of the Year finalist for '19 in IoT Category.
