Cloud Migration: 2-Wk Assessment

Estimated period of performance: 2-Weeks

As a Microsoft Gold Partner and Shadow-soft's engineers can evaluate. Get a review of your current Azure configuration and deployment based upon Architectural best practices based upon the Microsoft Azure framework. Identify areas for cost optimization, best utilization of elasticity, performance, scalability, and reliability.

What's Included:

- Full architecture review Azure foundation and services utilization
- Review of Azure fundamentals including subscriptions, networking, authorization and authentication, resource groups naming conventions, and automation
- Review of Deployed services such as databases, applications, functions, containerized services, storage, compute
- Evaluation of fundamentals and deployed services based upon the 5 pillars listed above
- Document findings, recommendations, and next steps

Key Benefits:

- Roadmap for optimization of cloud cost management
- Framework to best utilize cloud capabilities for operational excellence, performance optimization, reliability, and security.
