Modernize legacy applications with Azure: 5 Day Technical Assessment

ABOUT OZ:

At OZ, we collaborate with our clients to focus on specific challenge areas, assess existing applications, and explore business optimization scenarios. Our team includes experts in creating immersive user experiences, intelligently automating business processes, and streamlining workflows leveraging the latest Azure cloud technologies.

WHAT WE OFFER

We pride ourselves in the quality and reliability of our technical solutions and provide an envisioning to production, guided customer experience. By leveraging our OZWay process, we consistently deliver tangible results for our clients. Our teams have assisted multiple clients in their application modernization migration to the Azure cloud, let us show you how!

In this engagement we will focus on how your solution can be modernized with Microsoft Azure and we will provide you with a clear path towards a production solution.

Activities & Deliverables:

• Conduct collaborative design workshops to understand business challenges and needs
• Evaluate current application architecture and user experience
• Work with business and technical stakeholders to understand goals and requirements
• Provide an architectural roadmap & solution recommendations
• High-level cost analysis for application modernization to build and host using Microsoft Azure

Benefits & Outcomes: At the end of this assessment, you'll walk away with a clear picture of your applications current state, how it aligns to your clients' short and long-term needs, and actionable insights on how to take the next steps towards your modernization goals.

See what customers are saying:

"Our entire business was digitally transformed and moved to the cloud. Our underlying processes and technologies can now grow and change as quickly as our business grows and our needs change."

– Renee Anter, AHHC President

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
