Cloud
Managed Services Standard

Intelligent Visibility to Track and Manage Azure

How it Helps:

- Security
  - Identifies security vulnerabilities and misconfigurations
  - Compares workload compliance against selected security benchmarks
  - Provides specific security best-practice recommendations

- Technology
  - Assesses resource utilization and optimization
  - Identifies performance and availability recommendations
  - Compares resource characteristics to operational excellence principles

- Finance
  - Offers easy-to-use financial reporting dashboards and reports
  - Provides tagging and reporting capabilities to understand and allocate Azure spend

An Easy-to-Use App for Azure Management

Do you need intelligent visibility to better manage Azure?

Lightstream Cloud Managed Services (CMS) Standard helps solve this challenge by providing actional intelligence via Lightstream Connect, our easy-to-use, proprietary app.

Connect helps you track and manage data security and compliance, performance, cost, and IT governance in Azure.
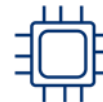

The First Step Towards Azure Optimization

CMS Standard helps you kickstart Azure management to drive the business outcomes you need. Upgrade to CMS Platinum to receive recurring reviews and recommendations from our Azure customer success and engineering experts. Our Platinum solution keeps you abreast of Azure innovation and brings resources and expertise to complement your day-to-day cloud management.
