

YOUR CLOUD MISSION, ACCOMPLISHED

Wherever you are in your cloud journey, you're in the right place. As your go-to for everything Azure, we'll get you set for powerful cloud capabilities by reducing all the challenges into simple steps and advice, so you can be sure of a stellar business outcome every time.

MAP OUT

Plan before you take off

The cloud can completely transform your organisation. But you can't launch without first understanding the way to long-term success. That's why we do the groundwork to assess your options and how you can bring cloud best practices to life, from getting to know your existing workloads and your team's skills to preparing for a powerful adoption.

WHAT IS THIS SERVICE?

If you're setting your sights on Azure and want to know exactly how it can work for you, our Azure Strategy Advisory service sets out a strategy to make sure failure isn't an option. Or, if you've found yourself in the dark from diving head-first into the cloud, we shine a light on getting the most out of your unique environment.

HERE'S HOW:

- Tried, tested & trusted Azure CAF alignment: we follow the Azure Cloud Adoption Framework to understand the very best route to seizing cloud control.
- Expert guidance: you're in good hands - all of our Solutions Architects and Technical Consultants are at the top of their game, trained to an Expert level in Microsoft Azure.
- Steps to success: after getting to know your unique goals, we'll create a tailored strategy report with actionable insights and recommendations to show you exactly how to realise your business ambitions.
- On hand to help: even after we've completed the report, our dedicated Azure Professional Services team are here ready and waiting to support you.

WHY SOFTCAT?

At Softcat, we work closely with you to take your Azure to the next level. Cutting through the complexity of the cloud, we put your business and your people's unique needs first to find a solution that'll really power transformative effects. Our experience, expertise and long-standing relationships with key partners means you'll constantly be able to seize new technologies and stay ahead of the curve.
