

# Cloud as a Value - Azure VMware Solution 1-day Workshop

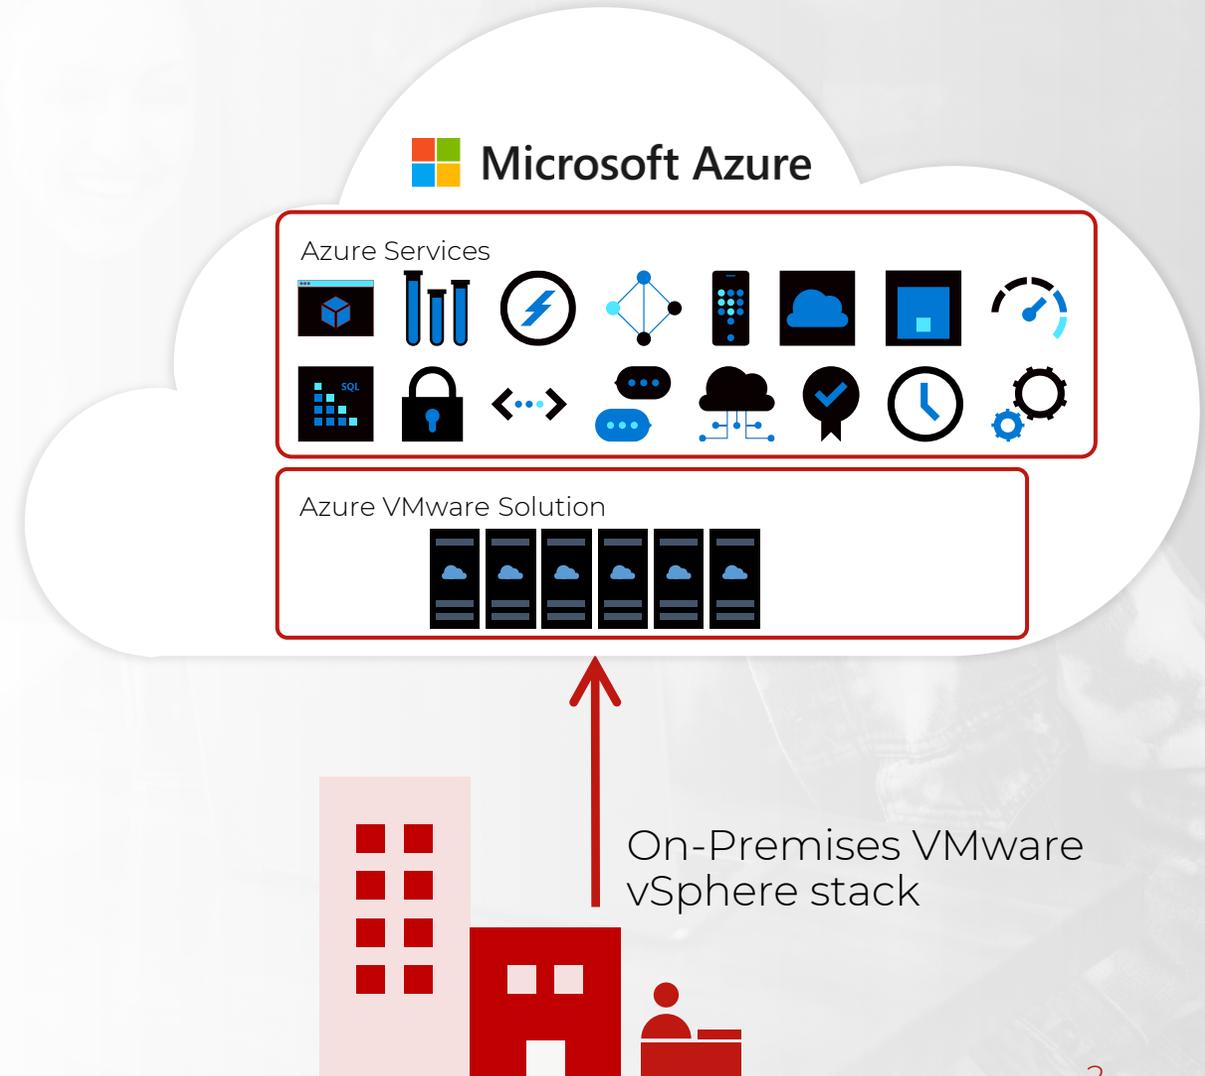

# Azure VMware Solution

## A complete VMware environment in Azure :

You can now run, manage, and secure applications seamlessly in VMware and Microsoft Azure environments with common tooling.

You'll be able to capitalize on your existing VMware investments, skills, and tools, including VMware vSphere, vSAN, and vCenter, while leveraging Azure's scale, performance, and innovation.

VMware workloads on Azure can easily be modernized through integration with services such as Azure Active Directory, Azure AI, and Analytics, enabling new intelligent experiences.

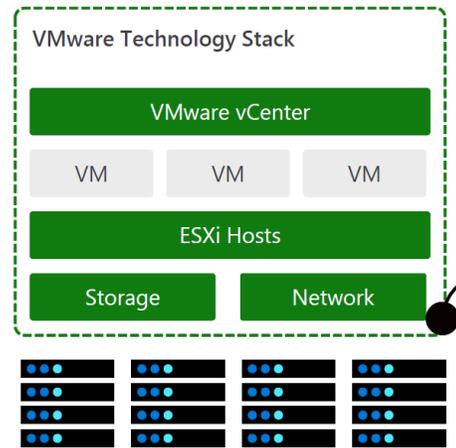

# Azure VMware Solution

A private cloud solution in Azure.

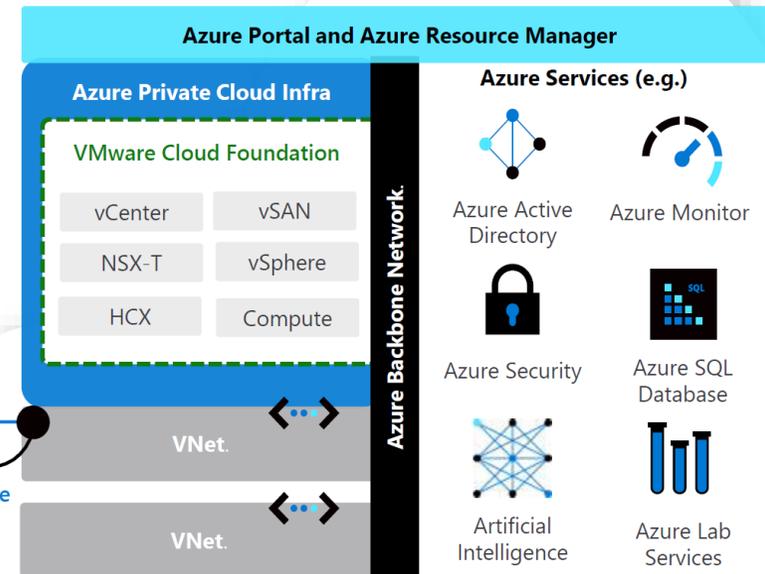

Software Defined Datacenter  
Virtualized network and storage

## On Premises Datacenter

ExpressRoute

## Microsoft Azure

## Azure VMware Solution 1 day Workshop

This workshop offers an interactive engagement between your teams and our experts on how to best address Azure VMware Solution.

### Organization

- Survey sent before our visit
- Workshop lead by technical experts (datacenter & cloud architectures, VMware environment, storage, Network, security, licensing)
- Discussion on expectations and constraints related to your industry or the solutions you provide
- Restitution

### Technologies

### Expected results & deliverables

- 1 powerpoint with macro points & challenges to address as a priority, including:
  - Range of solutions adapted to your context and your expectations
  - Overview of the benefits and value that your organization can draw from this solution
