

At last, **overview** of and **grip** on the cloud with **Cloud Insight as a Service**

Minimize cloud security risks and prevent excessive cloud costs

With the service **Cloud Insight as a Service** we jointly ensure you that your cloud environment is compliant with current security standards (CIS, HIPAA, PCI-DSS, ...)

In addition, this service guarantees a highly-efficient configuration of your cloud environment.

Finally, our service provides you with weekly access to our cloud experts. You can pick our experts' brain to make your environment both safer and more efficient, and to further enhance your cloud strategy. These goals are achieved by continuous monitoring and optimization of both the configuration and the

usage of your cloud environment. At least 200 Cloud Security and Cloud Cost indicators are validated, even when you run multiple cloud platforms such as Microsoft Azure and/or Amazon Web Services.

This results in overview, insight and control. Ultimately, subscribing to our service gives you peace of mind in the cloud: the real benefit of 'Cloud Insight as a Service'.

GUARANTEES

With this service we guarantee you:

At least **90%**
Security Governance
Compliance
of your cloud environment

At least **95%**
Cost Efficiency
of your cloud environment

100% access
to cloud expertise

Gartner®

PREDICTS...

- that through 2022, at least **95% of the Cloud Security failures will be the user's fault.**
- that through 2020, **80% of organizations will overshoot their cloud Infrastructure as a Service (IaaS) budget**, due to a lack of cost optimization approaches.

We see that Cloud Security and Cloud Cost Effectiveness are already becoming a challenge for many of our customers with a (multi-)cloud environment.
