

Optimise your Cloud Security Maturity for Future Resilience with the Sourced Cloud Security Assessment

Are you looking to gain a comprehensive insight into your cloud security posture?

The Sourced Cloud Security Assessment helps **Chief Information Security Officers (CISOs)**, **Heads of Cyber Security** and **Security Managers** assess the effectiveness of their organisation's security and governance practices in their cloud environments.

THE BENEFITS

Improve Maturity

Achieve security maturity, with a clear roadmap and effort estimation aligning to your risk strategy

Recover

Protect your organisation against reputation loss, regulatory fines, and substantial business costs

Enable Governance

Embed a robust cloud security culture across teams and cloud environments

Trusted Advisors

Leverage Sourced's deep expertise in cloud security for highly regulated industries

Build Assurance

Establish confidence in your organisation's cloud security practices

Gain Competitive Edge

Uplift based on comparative benchmarks against leading highly regulated peers
