ABOUT XCES

XCES is a hybrid cloud computing company focused on delivering:

- IT modernization technology assessment for on-premises compute, storage, and virtualization infrastructure
- Complete, turnkey Microsoft enterprise-level hybrid-cloud computing and storage infrastructure
- Solutions for state, local government and education, including cybersecurity to combat ransomware issues, disaster recovery for business continuity, and data governance through VM migration
- On-premises Microsoft Azure Stack HCI solutions for primary enterprise data centers, branch office/remote office and edge, virtual desktop infrastructure (VDI), high performance Microsoft SQL Server, trusted enterprise virtualization and security, and scale-out storage
- Validated Intel Select Solutions for Microsoft Azure Stack HCI, SQL Server and artificial intelligence (AI)
- Backup and disaster recovery solutions and designs with Microsoft solutions
- Backup/disaster recovery/ransomware solutions with Veeam Ready appliances with ransomware air gap
- On-premises RAID storage systems and intelligent edge appliances
- Cloud-based Microsoft Azure Services
- Data center consulting, deployment, management, and monitoring services

We are dedicated to taking IT environments to the next level, while always taking future-proofness and cost efficiency into account. With almost 20 years of experience, we know how to make the connection between traditional, on-premise infrastructures and modern, hybrid cloud solutions.
