Cloud Adoption Framework for Azure

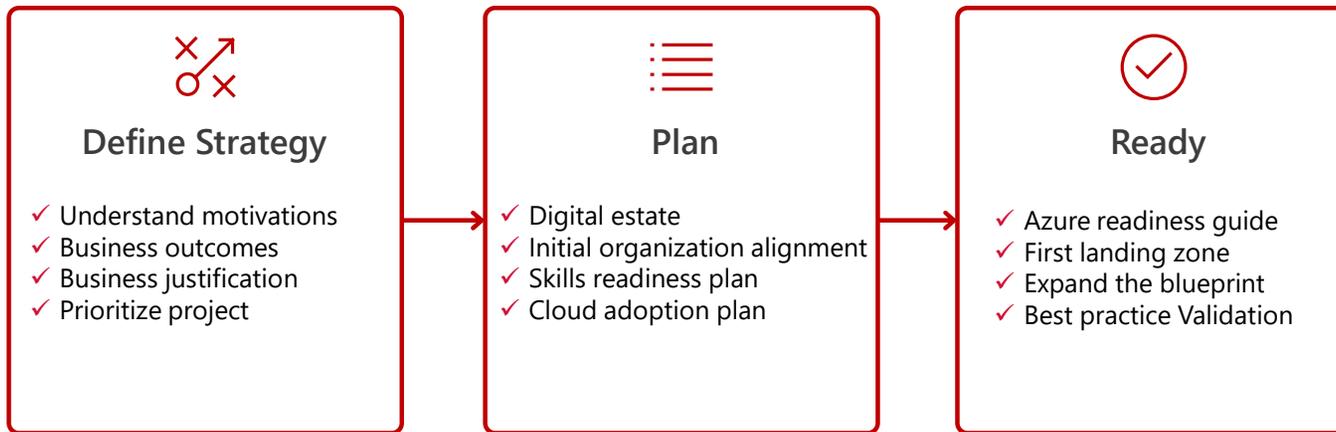

Define Strategy

- ✓ Understand motivations
- ✓ Business outcomes
- ✓ Business justification
- ✓ Prioritize project

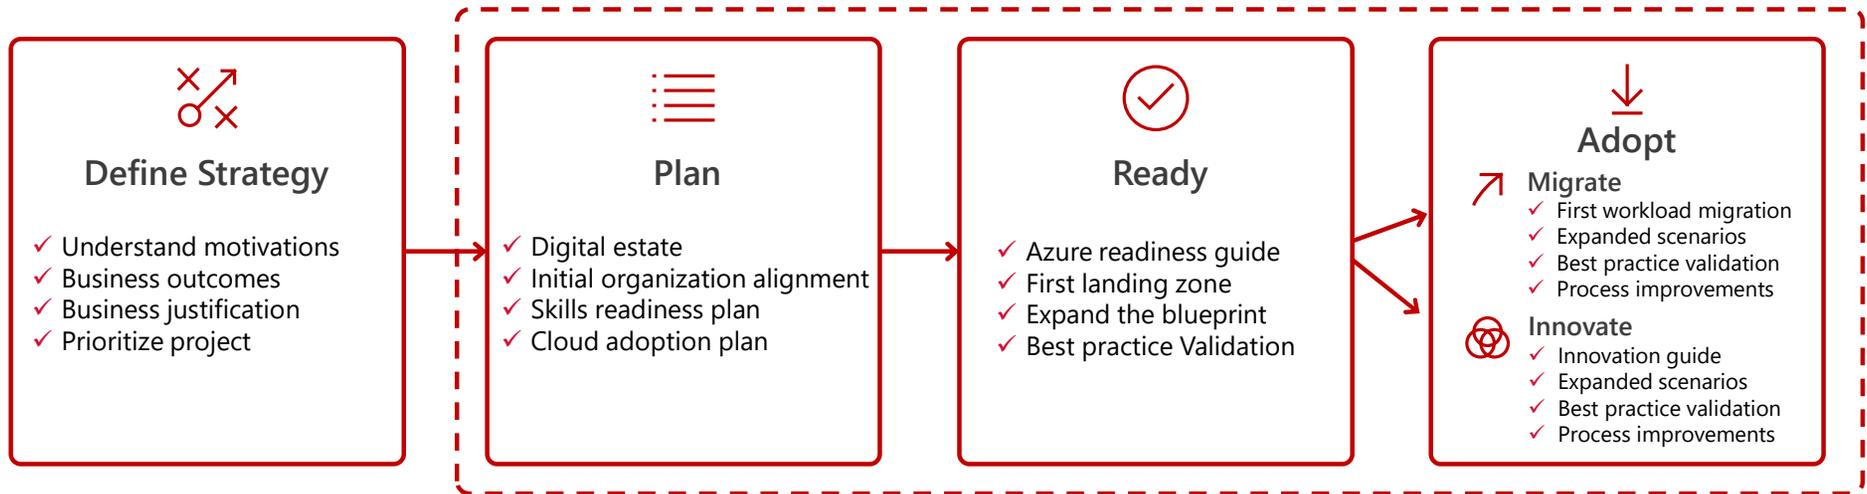

Cloud Adoption Framework for Azure

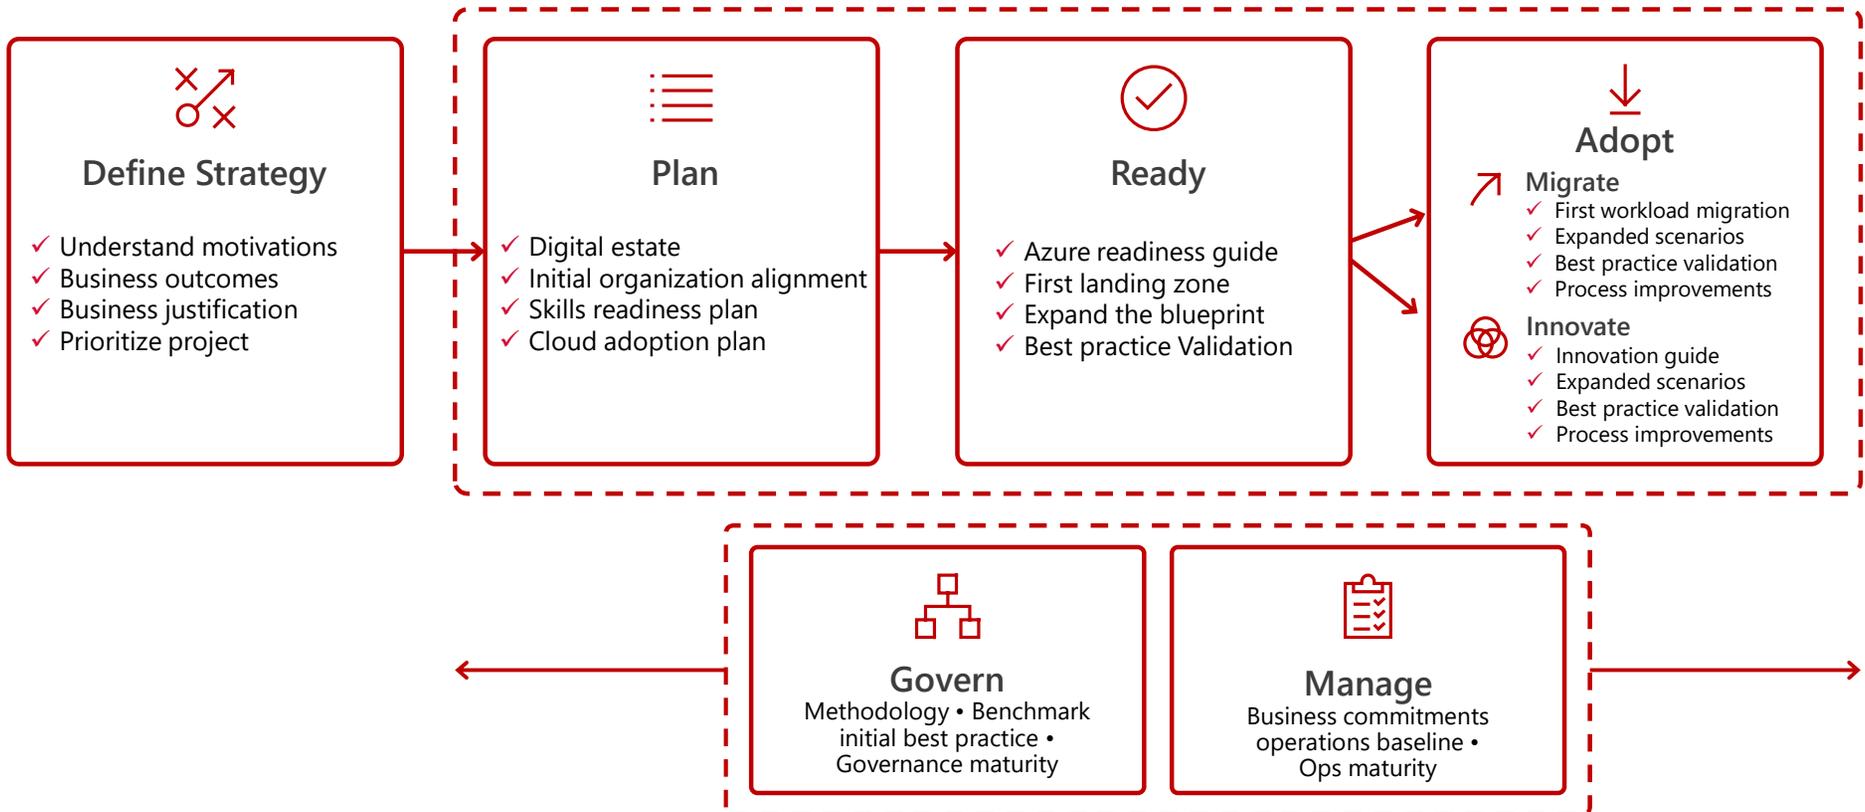

Cloud Adoption Framework for Azure

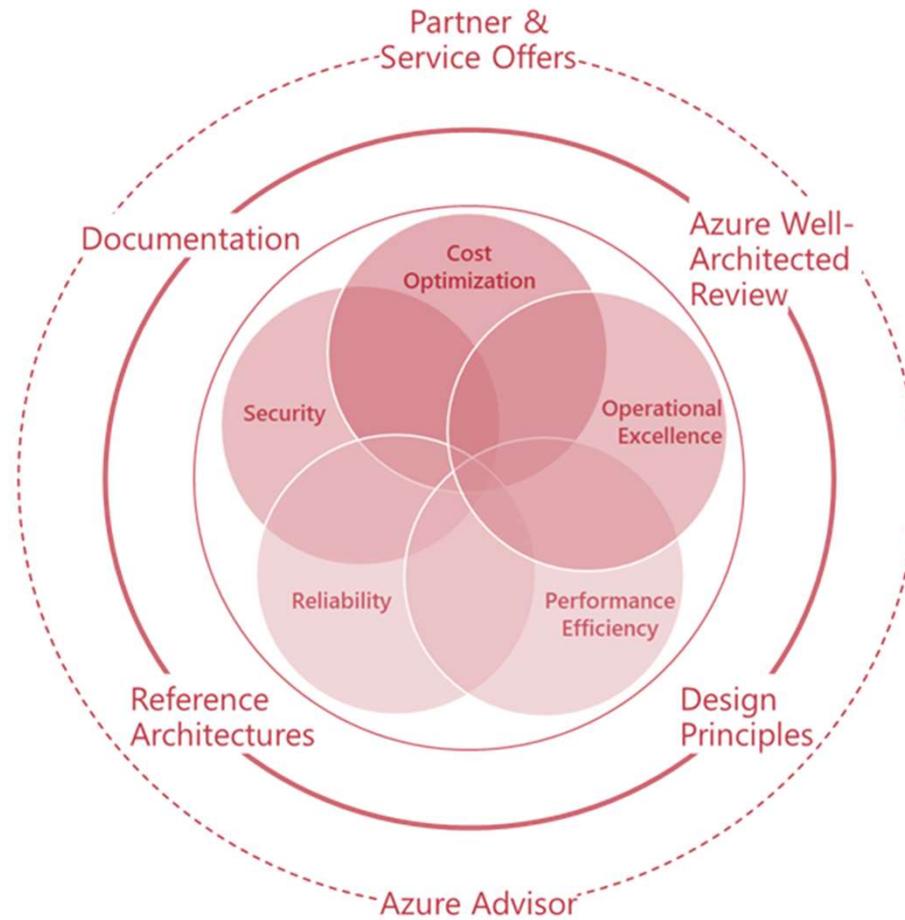

Cloud Adoption Framework for Azure

Cloud Adoption Framework for Azure

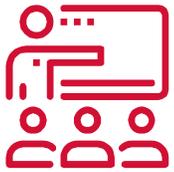

Well-Architected Framework

Azure Landing Zone – Prepare, Design and Build

A future-proof Azure foundation in 3 steps

Prepare →
Fundamental
knowledge

Design → Document
decisions

Build →
Azure Landing Zone

Workshop (2 days) – Fundamentals of Azure

Fundamental knowledge of platform capabilities

- ✓ Cloud 101
- ✓ Subscription models
- ✓ Cloud governance
 - ✓ Identity\RBAC
 - ✓ Emergency Access Account
 - ✓ Management groups, blueprints, policies etc.
 - ✓ Tagging, naming conventions etc.

→ Acquire relevant knowledge about Azure

- ✓ Network
 - ✓ VNet, subnet, DNS etc.
 - ✓ Connectivity options
 - ✓ Load Balancing
 - ✓ Hub and spoke / NVA
- ✓ Storage
 - ✓ Storage accounts
 - ✓ Managed Disks
 - ✓ Azure Files (Sync)
 - ✓ Backup
- ✓ Compute
 - ✓ Virtual Machine sizes
 - ✓ SLA\Disaster Recovery (ASR)
 - ✓ Azure Migrate

Workshop (1 day) – Cost Management and pricing

Fundamental knowledge of platform capabilities

- ✓ Governance related to Cost Management

- ✓ How to calculate costs incl. relevant pricing tools

- ✓ Considerations and best practices

- ✓ Right-sizing, snoozing, datacenter location, budgets etc.

- ✓ Azure Reservations

- ✓ VMs, storage, etc.

- ✓ Azure Hybrid Benefit

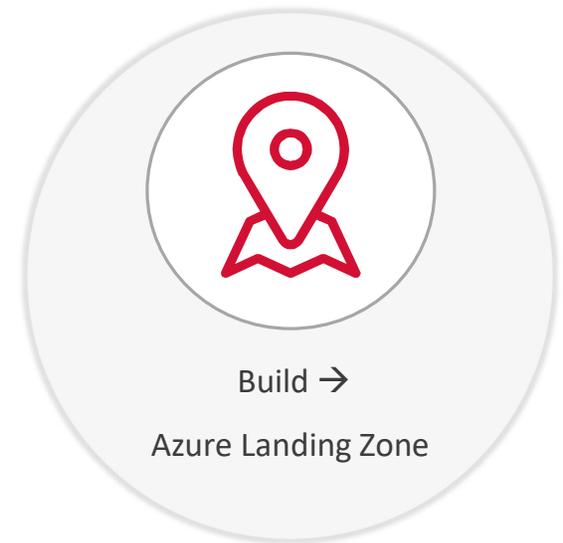

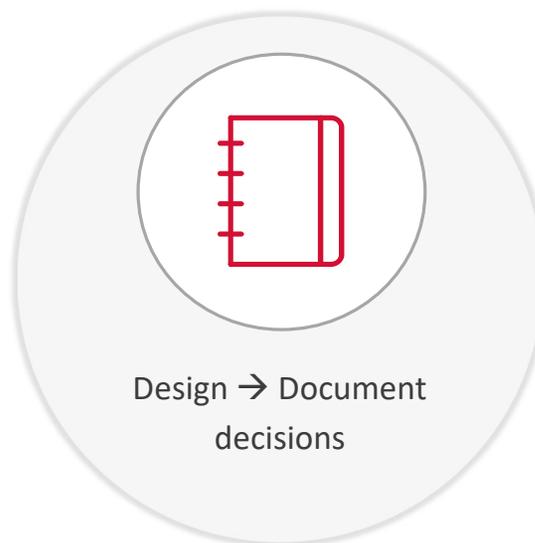

- ✓ Current on-prem licenses

- ✓ Software subscriptions

→ Acquire knowledge about optimizing costs in Azure

Azure Landing Zone – Prepare, Design and Build

A future-proof Azure foundation in 3 steps

High Level Design

Design decisions and architecture for the landing zone

✓ Based upon

- ✓ Input customer (current situation, requirements and future plans)
- ✓ Microsoft Cloud Adoption Framework (CAF)
- ✓ Other best practices
- ✓ Real-life experience SoftwareONE

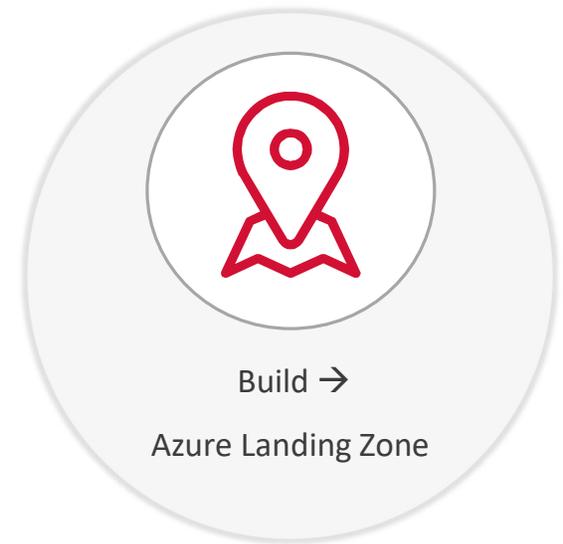

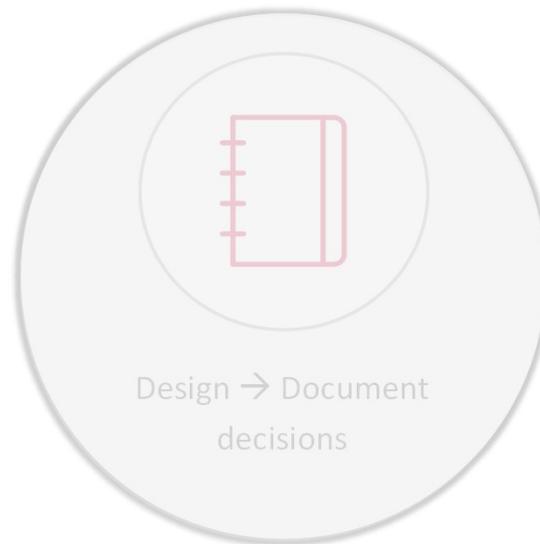

✓ Design decisions deal with components like

- ✓ Identity\RBAC
- ✓ Governance
- ✓ Network
- ✓ Storage
- ✓ Compute

→ Based on customer input, best practices and experience

Azure Landing Zone – Prepare, Design and Build

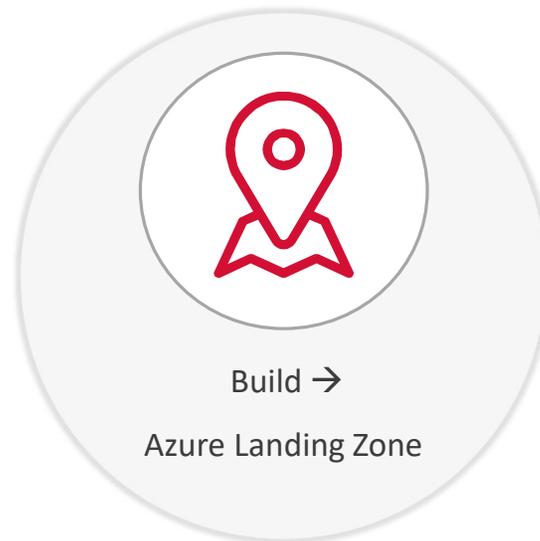

A future-proof Azure foundation in 3 steps

Azure Landing Zone

Building an Azure landing zone for future workloads

- ✓ Implementation of landing zone based on High Level Design
- ✓ Handover session

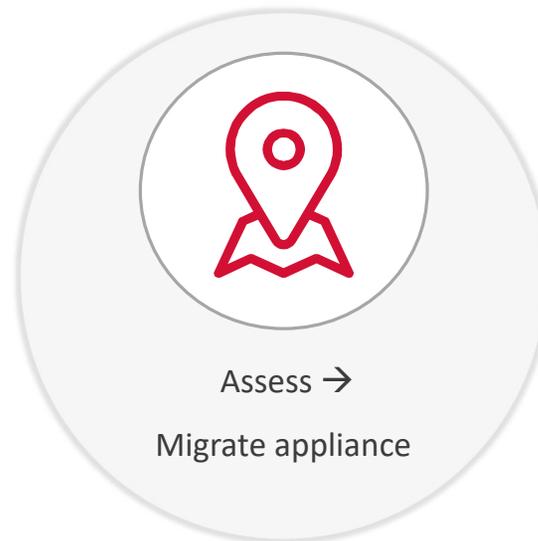

- ✓ Can be used for any future Azure projects
- ✓ Ready to accommodate all kinds of workloads

→ A ready-to-use Azure environment

Extra: Azure Migrate Appliance

Assess your current environment

- ✓ Server Assessment:
 - ✓ VMware VMs (vCenter)
 - ✓ Hyper-V VMs
 - ✓ Physical machines
- ✓ Agentless, server metadata is collected by a lightweight Azure Migrate appliance
- ✓ Azure readiness, sizing recommendations and cost estimation in Azure portal

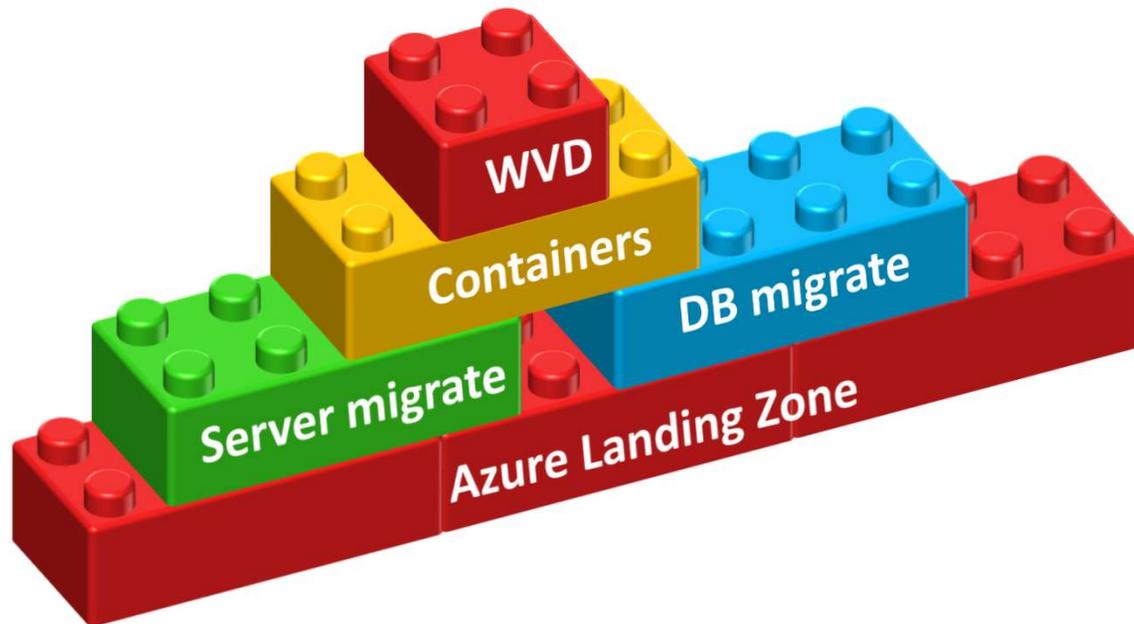

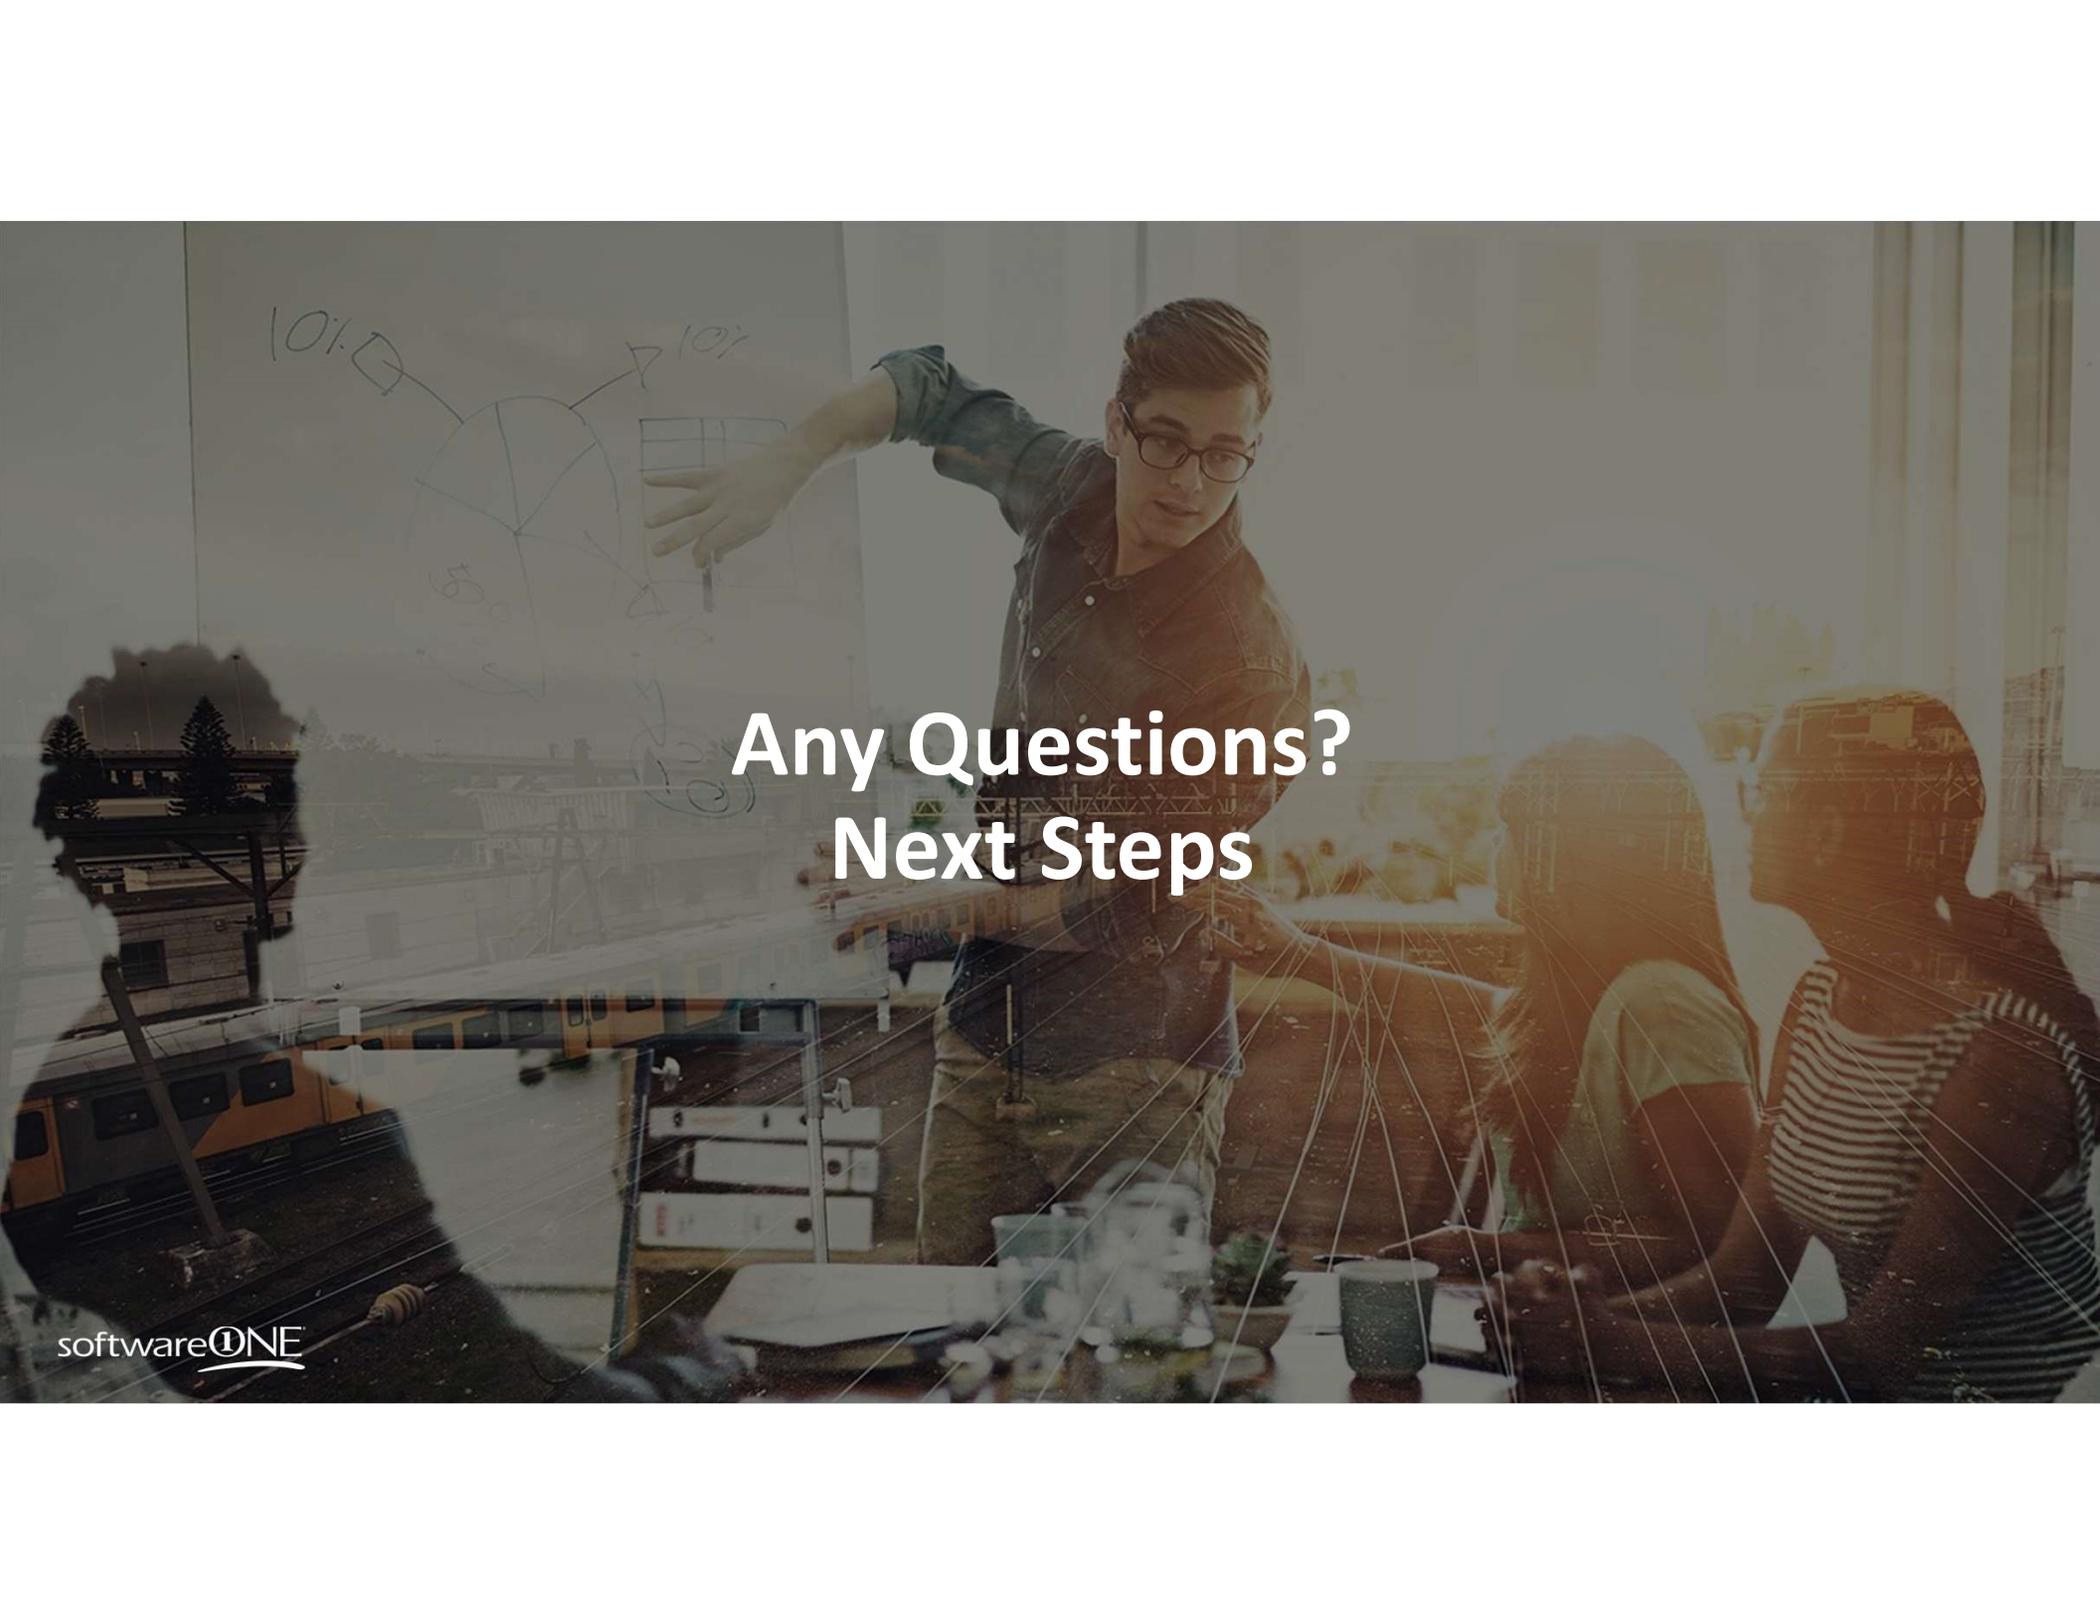

- ✓ Dependency visualization and inventory of apps, roles and features in Azure portal
- ✓ Extensive analysis by using Power BI*
- ✓ Professional report*

→ Discover and assess physical or virtual servers on-premises or in any cloud

Azure Landing Zone

Ready for Azure building blocks!

A man in a brown jacket and glasses is pointing at a whiteboard. The whiteboard has a pie chart with segments labeled '10%', '50%', and '10%', and a grid to the right. In the foreground, two women are sitting at a table, looking towards the man. The background shows a cityscape with buildings and a train.
