

Manufacturing Document Control Tool

Speed up the turnaround time to approve documents, reduce human errors, increase collaboration, and secure company intellectual property.

Change control is the systematic approach to manage and minimize the disruptive effects of all changes made to a product or process.

For many manufacturing companies, a well-structured document control process to support the change control procedure is critical for efficient operational and go-to-market strategies.

What is the solution?

Our Manufacturing Document Control Tool not only provides a centralized repository for the documents that support the product changes but also streamlines and automates a more efficient document approval lifecycle that allows for sound change management.

It helps enforce controlled processes and practices for the creation, review, modification, issuance, distribution, accessibility and security of documents.

Why customers use this solution:

- Increased Productivity
- Reduced Costs
- Faster Time to Market

Increased Productivity

- Simplify the creation, access and maintenance of all product documentation.
- Create clear organization of localized collateral
- Control access to product-specific, permission-specific content

Improve access to critical information faster

Reduced Costs

- Avoid misprints of outdated collateral
- Avoid costly production mistakes caused by human error
- Reduce documentation development and maintenance costs

Produce better margins on your investment

Faster Time to Market

- Faster time to market for product releases and updates.
- Enable a more "agile" form of supporting product development tasks
- Support rapid growth of product development

Stay more competitive with other brands

"With the help of Speridian, we were able to reduce the average document approval process from 4 weeks to just one week. As a result, we've been able to increase the speed of moving product innovation to market, all while maintaining the highest level of quality and compliance."

- Carolina Jaime, Quality Assurance Director
