Application Migration Services…Making Digitalization Simple

App Migration

Telekom Romania is offering added value professional services for its Azure customers by helping to migrate applications to the cloud. The covered services are: rehost, refactor, retain and rebuild

WHAT WE OFFER

REHOST:
Application is moved to the cloud provider environment (IaaS) while avoiding as many modifications as possible

REFACTOR:
Enhance your application with small changes

RETAIN:
Application gets rearchitected and enhanced with new capabilities for cloud usage to take advantage of technologies like autoscaling and dynamic reconfiguration.

REBUILD:
Application is rewritten using cloud native environment to have the ability to introduce new products and/or services.

Azure Application Migration

To remain competitive in today's market environment, businesses of all sizes in every sector need to digitize. Cloud-based solutions are key to this process, delivering security, flexibility and cost savings. We make digitization simple, adapting IT to suit our customer's needs – keeping it secure, up-to-date and scalable. Make your business fit for future together with a future proof provider.

KEY USE CASES

Agility
- Experiment more quickly
- Improve extended workflows

Security
- Resolve security challenges
- Safeguard reputation

Scale
- Scale more effectively
- Reach people across multiple platforms

Innovation
- Customize app experiences
- Tailor LOB apps
- Reduce IT maintenance

WHY Azure App Migration

Guarantee better performance
- End-to-end monitoring and business commitments (SLA's)
- Single point of accountability for network, applications and infrastructure

Deliver returns in quickest time
- Accelerated deployment using tools and frameworks created by experienced professionals
- Fully automated processes for small and semi-automated processes for large businesses

- **Optimize costs**
- Lower costs of total deployment through global delivery processes
- Access to best in-class talent following industry best practices
