

TO INCREASE 

Factsheet

Leverage mobile to complete all your logistics tasks in real-time from anywhere, any time

Anywhere for Rental

Microsoft Dynamics 365 Finance and Supply Chain Management

Your Problems Are at Core of Our Solutions

- ✓ Streamline rental operations and reduce costs with real-time information
- ✓ Identify and automate core processes to optimize resource utilization
- ✓ Improve productivity, service, and accuracy by leveraging mobile access
- ✓ Bring order to the logistic-related chaos in the equipment rental business

Benefits of Anywhere for Rental

Enhance the efficiency of workers easily with mobile capabilities to replace cumbersome paper-based workflow.

Improve accuracy drastically with the scan-and-check feature to collect the right rental equipment of all sizes before you ship and transport them.

Save on time and expenses with real-time entry by workers into their mobile devices at the time of processing transactions.

Implement and manage with ease, without additional IT support; leverage complete integration with Microsoft Dynamics 365 Finance and Supply Chain Management.

Select a business-friendly app that works for your mobile devices independent of operating systems.

Processes

Rental Shop

Deliver and return rented equipment on a job-site via the Rental shop functionality by merely scanning the worker card and item barcode.

Process Returns

Process planned and ad-hoc returns. Execute quality checks and report damages with follow-up actions like—repair, replace, or charge

Picking Items

Pick and ship your rental orders with ease and accuracy, using the mobile app for real-time updates and changes

Item Information

Get a 360-degree real-time updated view of your rental equipment inventory to provide the right information to all stakeholders

Counting

Use your mobile device to audit and update your inventory with performance-driven numbers by leveraging the counting journals

Features

In-built process consistency	An easy-to-use solution, Anywhere for Rental offers a consistent, progressive, and guided user interface.
Streamlined approach to customization	Maximize the Anywhere for Rental advantage by implementing and customizing the apps from Microsoft Dynamics 365 Finance and Supply Chain Management.
Multi-scanning support	The solution supports GTIN, GS1-128 barcode scanning, as well as RFID making it flexible and cost-effective.
Language adaptability	The solution is available out-of-the-box in English. You can translate it to other languages using Google Translate or MS Translate, which may have an additional cost aspect.
Choice of preferred devices	Create your mobile infrastructure with effective and affordable options as our Rental Apps run on almost any mobile device with a browser, including tablets, smartphones, and rugged mobile terminals.
Independent of operating system	The apps can run in Android, iOS, Windows CE, or Windows Mobile environments with consistently fast performance and solid reliability across operating systems.
Out-of-the-box processes	It includes standard processes like Rental shop (counter logistics), Return of large rental volumes, Return specific, Picking, and Counting.
Responsive display for any device	The solution can run on any device that has a browser. It is a responsive app that fits automatically to the screen size of the device it is executed. You can also configure device-specific dimensions to have a better view.

To-Increase

We are driven by our vision of empowering you, our customer, with software solutions that help you optimize your operations, grow, and lead in your sector. Our team of passionate technology experts works at anticipating potential problems our customers may face and provide easy-to-implement and use solutions that help them stay ahead of the competition.
