

Unleashing innovation: Windows Server and SQL Server on Azure

Speeding novel solutions to market is a key reason for migrating to the cloud. Achieving this goal requires freeing IT and development talent from management tasks like support.

Moving Windows Server and SQL workloads to Azure provides flexible, scalable, and highly available cloud infrastructure, while supporting rapid innovation and digital transformation—freeing you to innovate.

Benefits of running Windows Server and SQL Server on Azure

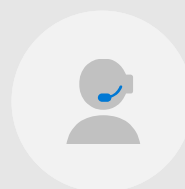

Better
integration

Better
compatibility

Less support
needed

Leverage
existing
Windows and
SQL skills

24/7
multilingual
support from
experts in
Windows,
SQL, and .NET
