Healthcare Solution

Microsoft 365 Compliance Workshop

Implement a compliance strategy that accelerates and streamlines data security and governance while reducing risk.

Healthcare Key Use Cases

ASSESSMENT

Assessment of your risk management priorities and compliance requirements.

ANALYSIS

Identify hidden compliance risks related to existing data within your organization.

RECOMMENDATIONS

Enable, track and review suspicious user activity leveraging Microsoft 365 tools.

Discover, protect, and govern your data

Healthcare and pharmaceutical organizations are working to deliver better patient experiences, better insights, and better care while addressing end-to-end security, compliance, accessibility, and interoperability of data. The first step for compliance and IT leaders is to be able to identify what data is present and where it is located. As strategic partners, Lighthouse and Microsoft provide visibility and expertise, showing firms how to use Microsoft 365 technology to develop and implement a simplified compliance strategy for long-term data protection and security in a legally defensible manner.

The workshop is combined with a Compliance Check. The Compliance Check leverages Microsoft 365 tools and services in an automated process that discovers data that is stored in the Microsoft 365 Cloud and analyzes it for the presence of artifacts that may impose a compliance risk to the company. The automated discovery process will analyze your existing data for sensitive information, intellectual property, unused data, and unusual activities.

The result is a deeper understanding and go-forward plan of how to use Microsoft 365 technologies to create a compliance plan that protects your firm's data.

Lighthouse team of experts provide insights to discover, protect, and govern data

Uncover data risks and streamline your compliance approach

After this workshop, you will know how to use Microsoft 365 tools to manage compliance risk in healthcare organizations, including:

- Use ediscovery searches to identify stale, outdated, and sensitive information.
- Actionable recommendations for improved data mitigation and governance.
- Detailed assessment of your IT and compliance priorities.
- Hands-on overview of Microsoft 365 tools and how they can help you develop an integrated compliance strategy.
- Long-term compliance strategy recommendations with detailed next steps.

Why Lighthouse?

With deep expertise in legal advisory and a trusted Microsoft partner, we help healthcare organizations take advantage of modern workplace technology tools.

PROACTIVE STRATEGY	PROVEN EXPERTISE	ELITE PARTNERSHIP
Our specialized teams keep pulse on changing technology, hyper-focused on both the technical implications and legal, compliance, and regulatory impacts to provide preemptive solutions evolving your institution's information governance, compliance, and ediscovery programs.	With more than 25 years of information governance, compliance, and ediscovery experience, we provide comprehensive strategies and best practices to ensure your programs surpass stringent legal and compliance requirements while reducing risk and costs.	Lighthouse is the premier Microsoft partner for information governance, compliance, and ediscovery. Our deep-seated partnership with Microsoft is built on trust and a more than 20-year collaboration, resulting in exclusive access to product insights and roadmaps.

For 25 years, Lighthouse has been a leader in innovative software and services to manage the increasingly complex landscape of enterprise data for compliance and legal teams. Whether reacting to incidents like litigation or governmental investigations or designing programs to proactively minimize the potential for future incidents, Lighthouse partners with multinational industry leaders, top global law firms, and the world's leading software providers as a channel partner.
