## Industry Challenges

Healthcare and pharmaceutical organizations are proactively reinventing communication to improve workflow efficiency, streamline collaboration, and connect data across existing sources. This increase in data leads to new legal implications to preserve protected data while improving outcomes.

In-house legal and compliance departments struggle to adopt, deploy, and manage Microsoft 365 features designed to support their programs.

Healthcare and pharmaceutical organizations need to ensure their deployment includes legal and compliance considerations at the beginning of the process so organization can protect sensitive patient data.

Deep subject matter expertise is needed in both platform functionality and organizational requirements to help healthcare organizations operationalize Microsoft 365.

# Microsoft 365 Compliance Workshop

Implement a compliance strategy that accelerates and streamlines data security and governance while reducing risk.

## Healthcare Key Use Cases

### ASSESSMENT

Assessment of your risk management priorities and compliance requirements.

### ANALYSIS

Identify hidden compliance risks related to existing data within your organization.

### RECOMMENDATIONS

Use Microsoft 365 to simplify compliance efforts and improve data protection, retention, and compliance.

## A Workshop Designed For Results

### Discover, protect, and govern your corporate data

Healthcare organizations are working to proactively engage with patients and gives caregivers tools to improve workflow efficiency, streamline collaboration, and connect data across existing sources to turn insight into action. This has created a gap and potential legal risk. The first step for Compliance and IT leaders is to be able to identify what data is present and where it is located.

As strategic partners, Lighthouse and Microsoft provide visibility and expertise, showing firms how to use Microsoft 365 technology to develop and implement a simplified compliance strategy for long-term data protection and security in a legally defensible manner.

### Workshop designed for your Legal, Compliance and IT staff

The workshop is combined with a Compliance Check. The Compliance Check leverages Microsoft 365 tools and services in an automated process that discovers data that is stored in the Microsoft 365 Cloud and analyzes it for the presence of artifacts that may impose a compliance risk to the organization.

The automated discovery process will analyze your existing data for:

- Sensitive information and intellectual property
- Unused or “stale” data
- Unusual activities

# Why Lighthouse?

With deep expertise in legal advisory and a trusted Microsoft partner, we help healthcare organizations take advantage of modern workplace technology tools

## PROACTIVE STRATEGY

Our specialized teams keep pulse on changing technology, hyper-focused on both the technical implications and legal, compliance, and regulatory impacts to provide preemptive solutions evolving your organization's information governance, compliance, and ediscovery programs.

## PROVEN EXPERTISE

With more than 25 years of information governance, compliance, and ediscovery experience, we provide comprehensive strategies and best practices to ensure your programs surpass stringent legal and compliance requirements while reducing risk and costs.

## ELITE PARTNERSHIP

Lighthouse is the premier Microsoft partner for information governance, compliance, and ediscovery. Our deep-seated partnership with Microsoft is built on trust and a more than 20-year collaboration, resulting in exclusive access to product insights and roadmaps.

Gold  
Microsoft  
Partner

For 25 years, Lighthouse has been a leader in innovative software and services to manage the increasingly complex landscape of enterprise data for compliance and legal teams. Whether reacting to incidents like litigation or governmental investigations or designing programs to proactively minimize the potential for future incidents, Lighthouse partners with multinational industry leaders, top global law firms, and the world's leading software providers as a channel partner.
