

[Power BI: 2-Week Proof of Concept](#)

[Price: \\$20K](#)

**Develop a Power BI Pilot solution, in a secure and scalable way, providing actionable data visualizations effectively using all the data sources**

The Proof of Concept (POC) will demonstrate how to enable your organization to achieve the most value from your data, create actionable business reports all the while ensuring security and scalability.

Our team of certified Power BI experts help clients implement a functional and scalable PoC for a use case and relevant data by developing a dashboard based on your unique business and operational needs.

Why our customers prefer POC:

- Rapid Power BI POC Implementation and Rollout
- Defined Power BI Roadmap & Strategy
- The Right Technical Design and Data Architecture

Agenda:

Week 1

- Assessment of the current Data structure and reporting tools
- Understand the requirements and identify the use cases for POC
- Analyze the alternative solution approaches and recommend a solution
- Define the implementation road-map

Week 2

- Develop the POC for the identified use cases in Power BI,
- Train the respective team members on the creation of powerful visualizations and usage

*Note: The pricing is subject to change depending upon the scope of the project*
