powered  
by **nuboj**

Connecting Things to Results.

The **ready-to-use, intelligent IoT product** that collects and analyzes data from connected machines and transforms them into useful results to improve the business of **device manufacturing** and **management companies**.

Nuboj® IoT product connects machines and makes them able to produce and exchange data that, once analyzed, return **valuable results** useful to **improve** the **business**.

NUBOJ is ready to use and grants the companies a **fast starting** and a rapid return of the investment.

Some of the **results achieved** by our customers who have already chosen Nuboj:

**+25%**  
increase in revenue

**-30%**  
operating costs

**+50%**  
increase in  
production

**-50%**  
reduction in warranty  
interventions

**-84%**  
time to market

## FROM INTERNET OF THINGS TO **INTERNET OF RESULTS.**

### EFFICIENCY

Through analytics and the insights, you can optimize production and improve machine utilization.

### NEW BUSINESS

With a different perspective on machines, you can identify new services directly related to your own, generating new revenue

### CUSTOMER CARE

Collected data enables the study of previously unknown information: end customer usage habits, machine status for both engineering and commercial purposes.

### MONITORING

With real-time machine information, you can intervene promptly, giving customers a compelling reason to be chosen.

### PROACTIVITY

Thanks to the binomial monitoring/know-how, you can take more care of the customer, ensuring a correct and more performing use of the purchased product.
