CONTINUOUS PROFESSIONAL DEVELOPMENT

WHAT IS CPD?

Members of a professional body are required to keep track of tasks related to their profession. Whether your organisation has accountants or solicitors, they need to conduct Continuous Professional Development (CPD).

Over the years, we discovered that most out of the box CPD systems don't meet the needs of most organisations. Therefore, we created our own.

WHY HG TECHNOLOGY?

At HG Technology, we have developed a CPD system that can be manipulated and customised to further meet your needs, and can even be integrated with your internal Time Entry system.

Our CPD application allows users to enter a task they wish to complete and a timeframe for completion. Users can then add entries against certain tasks, along with the time it took, and a description.

KEY FEATURES

CUSTOMISABLE STRUCTURE

Our system is fully customisable to ensure that it meets the requirements of a professional body as well as being beneficial to your organisation.

TIME ENTRY INTEGRATION

Link our CPD application to your internal Time Entry system, so that you know how your employees are spending their time.

REPORT GENERATION

We have implemented the ability to generate reports based on CPD entries. This gives you the ability to better understand how your time has been spent.

USER FRIENDLY

Our CPD system is very user friendly and easy to navigate. Simply enter tasks, time frames and individual time entries against those tasks to help you keep track.

PRICING

£xxx per user per month

Which includes support

Implementation Cost:

Creation & implementation of tailor-made CPD system and user set-up
