AZURE WELL-ARCHITECTED ASSESSMENT

CONSID

AZURE WELL-ARCHITECTED ASSESSMENT

The **Consid Azure Well-Architected Assessment** is an expert *analysis and assessment* of your existing architecture to benchmark and discover focus areas for improvement according to the five pillars in the Azure Well-Architected Framework.

OPERATIONAL
EXCELLENCE

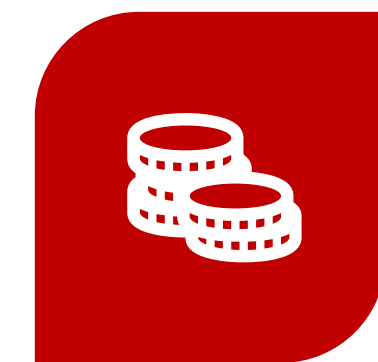

SECURITY

RELIABILITY

PERFORMANCE
EFFICIENCY

COST OPTIMIZATION

CONSID

AZURE WELL-ARCHITECTED ASSESSMENT

Why?

A good architecture contributes to and increases the likelihood of business success.

Consid's Azure Well-Architected assessment provides a report covering areas for improvement including potential outcomes and priorities in a suggested roadmap. As a starting point for this journey Consid offers an *assessment* of your architecture focussing on gaps compared to established practices from Azure WAF in combination with our experience

CONSID

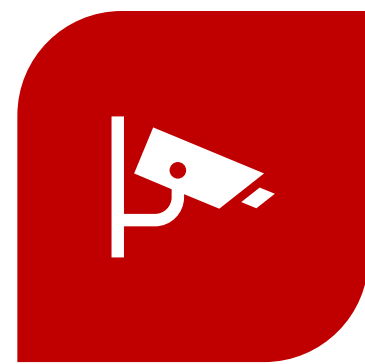

AZURE WELL-ARCHITECTED ASSESSMENT

How?

Consid's assessment highlights *strengths, weaknesses and deviations from the Azure Well-Architected Framework* and presents the result in a *structured report containing met requirement, deficiencies, and recommended mitigations*. Our experts will assess and evaluate the suitability of the architecture from the perspectives of operational excellence, security, reliability, performance efficiency and cost optimization.
