- Our expertise across Microsoft devices and platforms pairs naturally with our services to create a beautiful experience

Surface Hub Swift Pass

Choice of **free** virtual service with purchase:

1. Site/Environment Assessment
2. Installation
3. End User Training

| Surface Hub Swift Pass

Virtual Assessment, Installation, or Training:

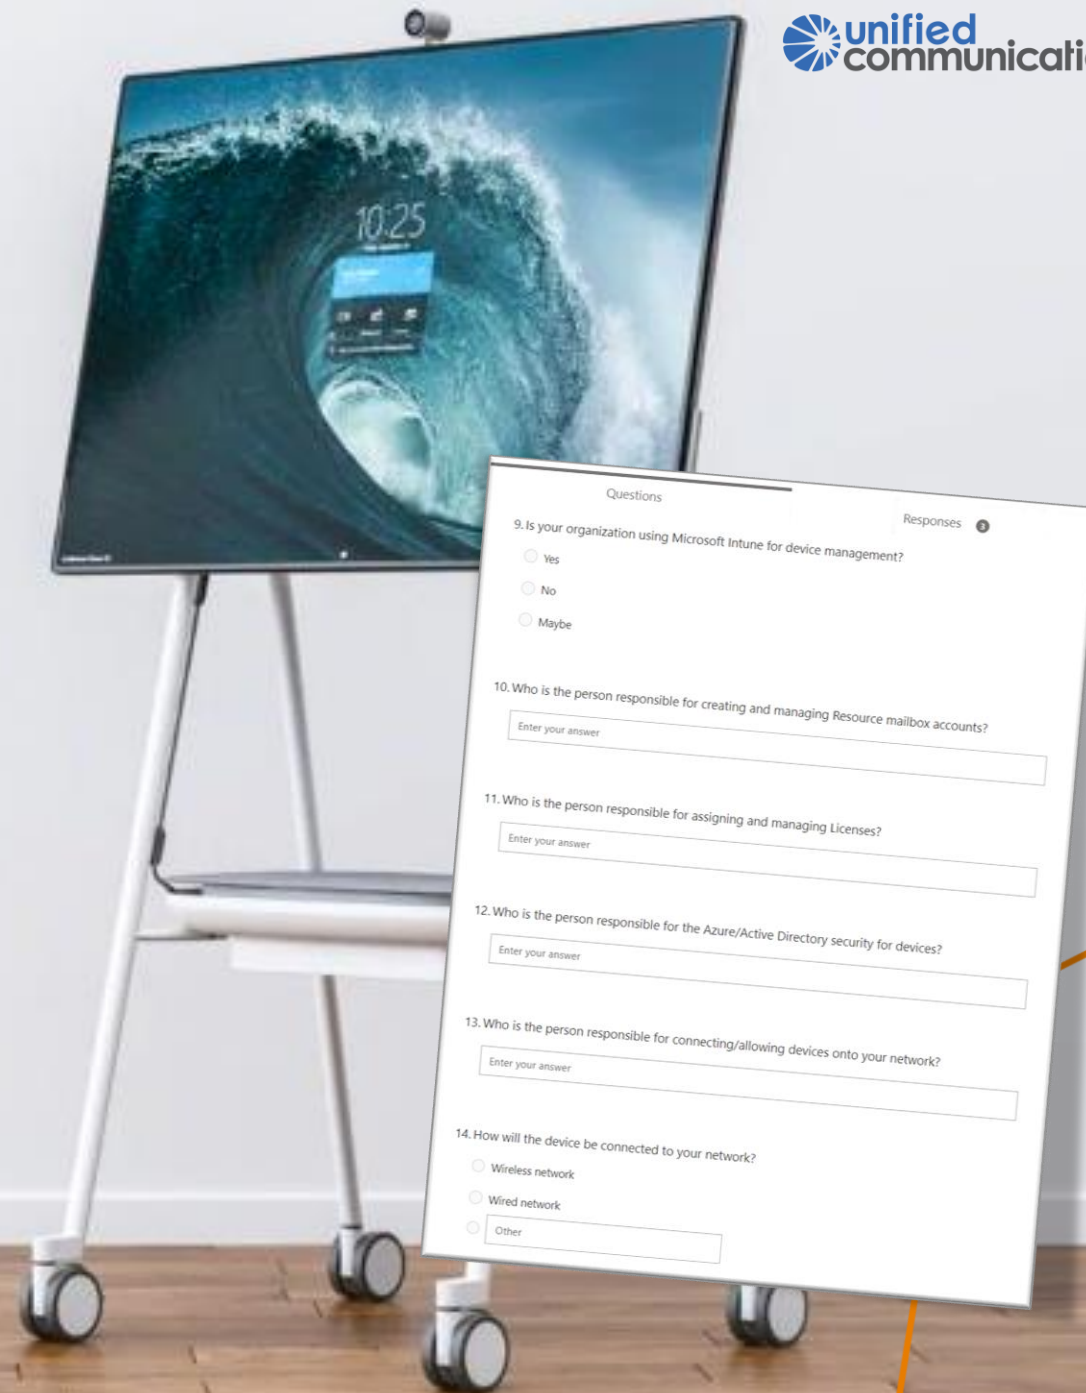

Choose 1 with purchase of a Surface Hub 2S (up to 2 virtual hours):

- **Site/Environment Assessment:** Ideal for customers who are new to M365 and Modern Workplace technologies and integration
- **Installation:** Ideal for customers who want to ensure Surface Hub is installed to the right specifications and best practices
- **End User Training:** Ideal for customers who have experience with MS Modern Workplace and M365 and want to incorporate Surface Hub into their meeting workflows and collaboration

Site/Environment Assessment

- We understand that every organization faces unique challenges on the journey to true collaboration technology integration
- Our guided assessment will ask the right questions to help you identify potential risks and outline the remediation steps necessary to make Surface Hub fit perfectly into your environment
- Our experts have years of experience discussing all aspects of Surface Hub preparation, security, and management with any audience
- This session will rapidly accelerate deployment time by mitigating issues before they arise

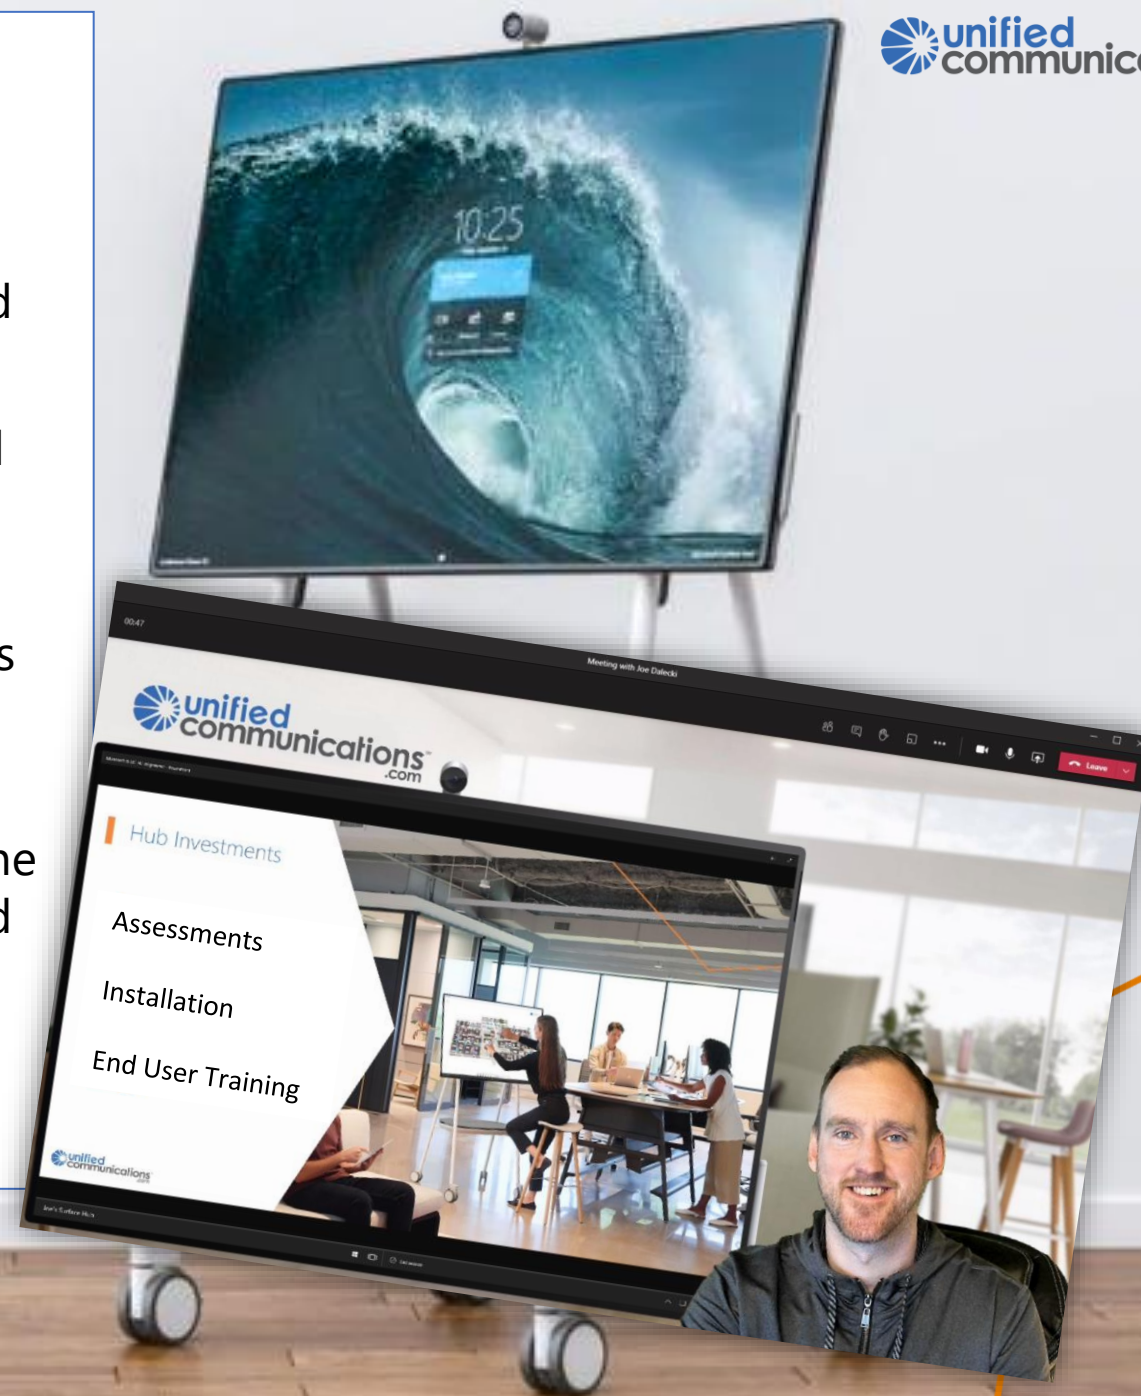

I Installation

- We are experts at Surface Hub installation whether on mobile stand, wall mount, or floor mount
- We take the time to ensure all guidelines are safely adhered to and best practices are followed
- Our installations pay close attention to every detail to make sure Surface Hub works exactly as expected from day 1
- Our post-install checklist will confirm every feature is tested and all accessories are operating as intended

End User Training

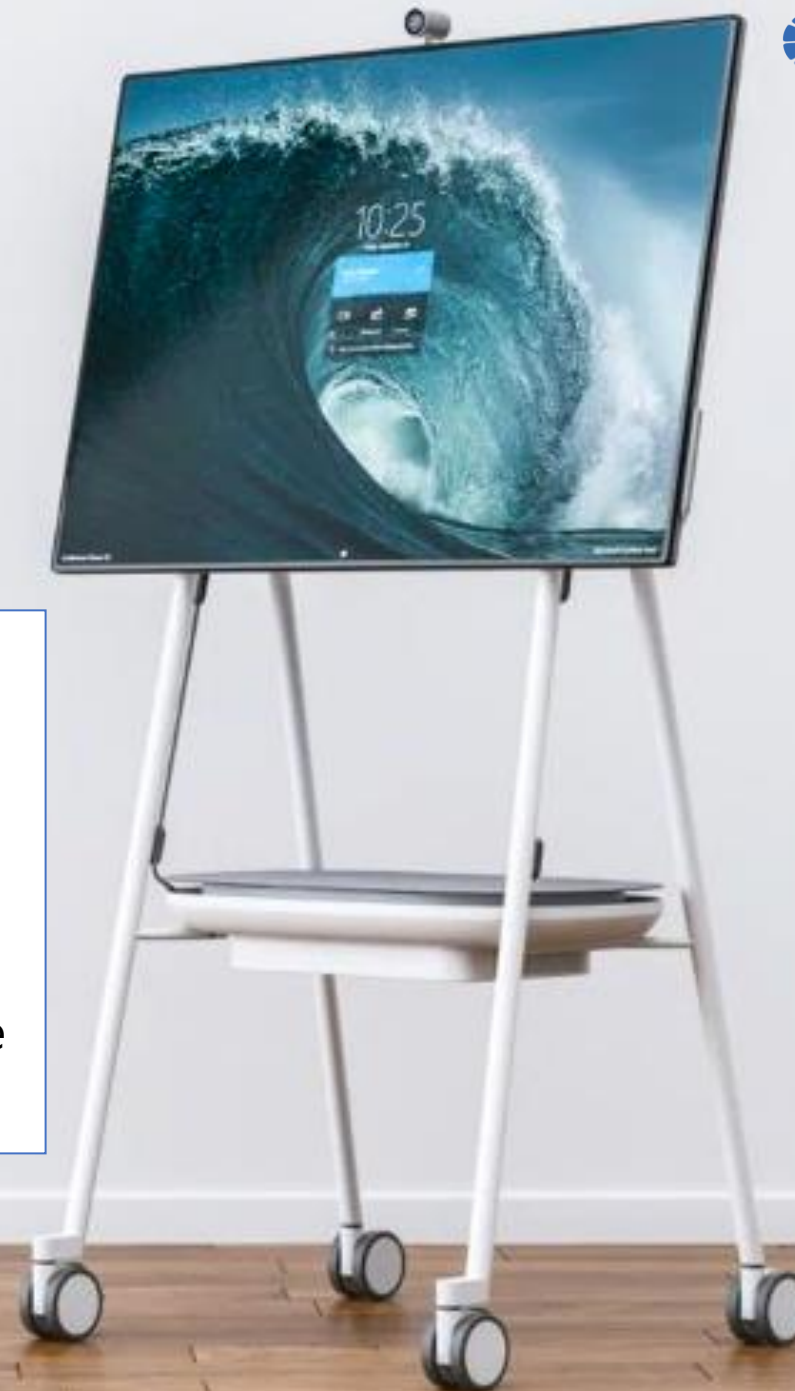

- Our team helped develop the world-wide standard Surface Hub adoption and training program
- All adoption and awareness sessions are produced using the latest tools in broadcast technology to leverage Teams Meetings and Live Events
- Our experts stay on top of the latest developments in Surface Hub feature availability and roadmap
- We deliver custom, business-driven, industry-specific, day-in-the-life scenarios that give users the confidence to take their collaboration sessions and video conferences to the next level
- Our trainers bring deep presentation skills that drive virtual interaction and engagement

Next Steps

- Let us know how we can help you get started on your collaboration journey
- We want to partner with you and ensure you have the answers and tools you need now and down the road

THANK YOU
