

Security and Compliance

Extend Data Protection and Governance across Apps, Endpoints, and Platforms

How Secure is your Organization?

- Do you know who is accessing your data?
- How do you feel about security of your organizational data?
- Are all users empowered to work securely anywhere at any time?
- Can you quickly find and react to a security breach?

Microsoft recognized Netwoven for extending the capabilities of Microsoft Information Protection (MIP) suite

Member of Microsoft Intelligent Security Association

Microsoft

With remote and hybrid work becoming a norm, mobility and security, no doubt, play pivotal roles in enhancing employee productivity. At the same time, it also increases the vulnerability and security concerns of organizations. Proactive protection and security of your IT environment is critical to your business.

Netwoven delivers the right, cost-effective security solutions for your organization, in alignment with your digital transformation journey and helping you minimize risk. Netwoven offers Managed Security Services for all your infrastructure and security needs, backed by our Gold Enterprise Mobility Management Competency amongst others.

Services and Workshops

Identity and Access Management

Are you aware of suspicious user and sign-in behavior in your environment? Are you threatened by ongoing suspicious requests? Protect user identities with this assessment workshop!

Standard Securing Identities Assessment Workshop →

Unified Endpoint Management

How are you managing your mobile devices and other user endpoints? Are your user's devices compliant with your IT policies? With this workshop, enable users to be productive and secure on any device.

Standard Endpoint Management Workshop →

Sensitive Information Protection

Success of a good Sensitive Information Protection program begins with defining your strategies (Information/Protection/Organization/Technology/People) and well-defined metrics for implementation. Click here to learn how:

Download Solution Brief →

Threat Protection

Do you know about the security vulnerabilities in your hybrid and multi-cloud environment including VMs, databases, Azure storage, and more? Are you aware of the number of suspected authentication activities across your multi-cloud environment? Improve your cloud security posture with a Microsoft Hybrid Cloud Security Assessment Workshop.

Standard Hybrid Cloud Security Assessment Workshop →

Security Operations

Security information and event management (SIEM) solutions built for yesterday's environments struggle to keep pace with today's challenges, let alone tomorrow's unimagined risks. That's why Microsoft developed Azure Sentinel, a fully cloud-native SIEM. See and stop threats before they cause harm with an Azure Sentinel Workshop.

Standard Azure Sentinel Assessment Workshop →

Governance Risk & Compliance

Organizations that were focusing on external cybersecurity threats now consider the risks posed by insiders as a larger threat. They are keen on establishing controls that enable them to quickly identify and manage insider risks.
