

New approach to Microsoft 365 email security keeps kids' health data secure

"After having a few near misses, we decided we needed to review our email security solution.

We came across MailGuard 365 in a LinkedIn Group, where many people were recommending the solution.

With our previous email security provider, we had to run manual updates on all employees' machines. This was an arduous and time-consuming process with many viruses slipping through the cracks.

Since implementing MailGuard 365 everything just runs itself. Set up was easy and we get daily reports

showing what threats are being picked up. This gives us peace of mind that it's doing its job and that we're covered.

I highly recommend MailGuard 365 to any organisation that wants the ultimate protection of their Microsoft 365 inboxes.

It's reliable, great value for money and their service is top notch. It doesn't matter where you are in the world!

"We can rely on MailGuard 365. It takes the pressure off, and I know the job is being done and we are protected. The dashboards and reports are great tangible proof that the solution is working."

The problem

"A year ago, we migrated to [another vendor solution] and had a few near misses that were picked up. But one user inbox got hacked and it was at that point we decided to look at alternatives.

A lot of viruses were slipping through. We have a lot of shared mailboxes, adding a layer of complexity, but MailGuard 365 sorted that out.

We have been using the solution for some time now and I would highly recommend MailGuard 365."

The MailGuard 365 difference

Phishing, Ransomware, BEC are things we never want to personally experience. One email is all it takes to destroy businesses. Office 365 users are prime targets of these threats. MailGuard 365 makes life safer and easier for those users. It's the last check before your staff could make a catastrophic mistake.

Adopting a evolutionary approach to email security, MailGuard 365 is exclusive to the Microsoft Marketplace. It is a cloud-based email security solution made better together by our collaboration with Microsoft. MailGuard 365 combines 20+ years of specialized email security expertise and IP from MailGuard, with the best of Microsoft Azure and ML/ AI.

Key benefits:

Single-click Activation

Activate enterprise-wide protection within a minute. No download required as MailGuard 365 is built on Microsoft Azure and is activated in the Microsoft marketplace with your Microsoft credentials. Get started with a single click, stopping advanced email threats immediately.

Evidence-based reporting

Complementing upstream security services like the Microsoft 365 security stack and other third-party email security vendors, MailGuard 365 takes a new approach. This means it is last to inspect emails, allowing for world first evidence-based reporting that demonstrates its stopping power.

No end-user training

Designed to provide peace of mind to end-users and IT admins, MailGuard 365 works in the native Office 365 environment with no set-up headaches. Threats are moved to the users' junk and deleted items folders, so no additional training is required.
