

# SEAtS UKVI Compliance Toolkit

## ABOUT UKVI COMPLIANCE TOOLKIT:

SEAtS identifies at-risk students, who are not visa compliant, and connects them with staff for better outcomes. Tier 4 Compliance doesn't have to be complicated.

### See what customers are saying:

*"SEAtS offered us an immediate solution to support our Visa and immigration Compliance Policies and Processes for the entire South Wales campus. The software easily interfaced with our existing campus systems."*

*— Liam Bryson, Deputy Director of Student and Academic Services, University of South Wales*

### Key Features:

SEAtS UKVI Compliance Toolkit allows clients to **decrease the time taken to generate visa compliance reports by 98%**. Support your institution with the ability to meet Tier 4 visa and immigration compliance obligations.

**Automatically flag students who do not meet requirements.** There is also the option to automatically email the student using a pre-populated template explaining that the student is not meeting their visa obligations and outline next steps.

**Real Time reports on each student.** Generate daily, weekly or monthly UKVI reports on student progression.

**Automated alerts for streamlined administration** to stay on top of student progression. Spend less time searching, and more time advising your students for better outcomes.

SEAtS **Communication Hub** simplifies communication by allowing users to send communications directly from the SEAtS Platform. While templates are provided, a user can create their own communication, like an email or letter. Each of these communications is stored directly in the student profile.

# Why Microsoft Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
