Moresi.com ISV migration proposal

Technical Deep-dive

It's all about data.

Migration Phases

↓

ANALYSIS

Analysis of the application and its components and careful assessment of the opportunities and risks related to migration.

↓

PLANNING

Drafting a detailed roadmap for achieving the objectives set.

↓

CONSTRUCTION

Assistance at all phases of migration and subsequent steps of infrastructure design and optimization.

↓

MANAGEMENT

Continuous monitoring and optimization of infrastructure with our managed services.

↓

SUPPORT

Troubleshooting assistance to ensure seamless and fully functioning services.

↓

COST MONITORING

Maintain control and optimize infrastructure costs for running business applications.
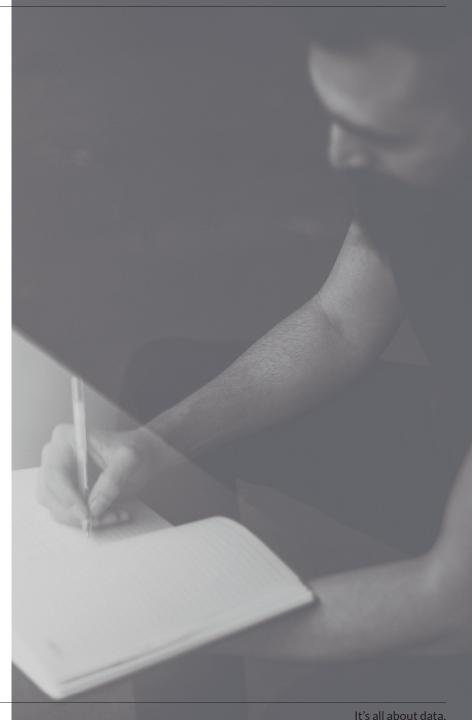

ANALYSIS

GOALS

→ *Verify if all the workloads can be migrated to Azure (supportability matrix)*

→ *Get a detailed overview of the costs once the migration is complete*

→ *Identify migration drivers*

→ *Define migration strategy*

→ *Define performance benchmarks*

TOOLS

→ *Azure Migrate, SQL Server Migration Assistant, Data Migration Assistant, Database Experimentation Assistant, Azure Solution Assessments, Modernization workshops*

DELIVERABLES

→ *Feasibility study document*

It's all about data.

PLANNING

GOALS

→ *Getting customers ready to make the move by skilling up their staff and involving proper people*

→ *Define milestones and success criteria*

→ *Define all the steps needed to publish the solution into the Azure Marketplace and to create a transact offer*

TOOLS

→ *Teams (Task), Planner, Power BI*

→ *Azure Hybrid Benefit*

→ *Azure Reservations*

DELIVERABLES

→ *Business Case, Migration Plan*

It's all about data.

CONSTRUCTION

GOALS

→ *Execute the migration "on time, quality and budget"*

→ *Respect milestones defined in the Planning Phase*

→ *Define Test cases and test strategies*

TOOLS

→ *Azure Migrate, AzCopy, Azure Database Migration Service,*
   Azure SQL Migration extension in Azure Data Studio, Azure Site Recovery

DELIVERABLES

→ *Test Plan document*

It's all about data.
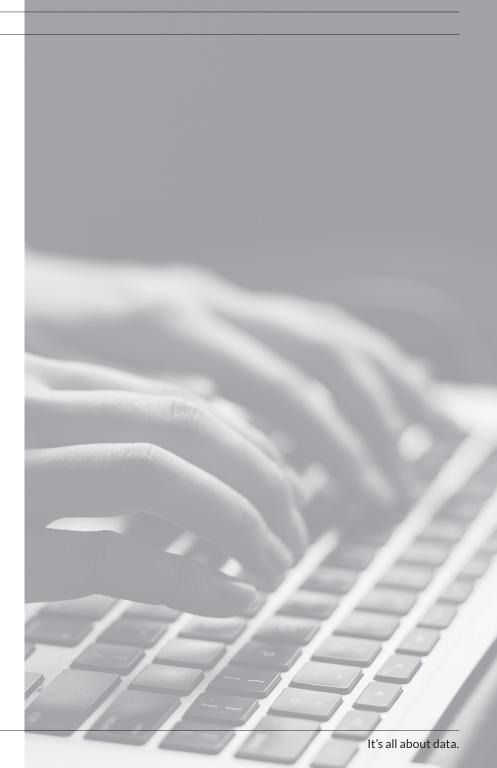

MANAGEMENT

GOALS

→ *Continuous monitoring and optimization of infrastructure once the migration is complete*

→ *Simplify infrastructure management with the introduction of DevOps methodologies*

→ *Keep data safe and secure*

TOOLS

→ *Azure Monitor, Application Insights, Security Center, Azure policies and blueprints, Azure DevOps DevOps*

DELIVERABLES

→ *Periodic recommendation reports*

It's all about data.

SUPPORT

GOALS

→ *Provide **proactive** support based on a service catalog activity list*

→ *Provide **reactive** support on-demand based on SLAs agreed with the customer*

TOOLS

→ *Jira*

DELIVERABLES

→ *Service Catalog document*

It's all about data.

COST MONITORING

GOALS

→ *Monitor Azure Cost once the migration is complete*

→ *Set Budgets and alerts*

→ *Provide guidance regarding licenses and new opportunities and programs that can help to save money*

TOOLS

→ *Azure Cost Management, Azure Portal*

DELIVERABLES

→ *Azure Cost Management manual*

It's all about data.
