# Make your access to data secure and easy with Azure Virtual Desktop

## ABOUT SOFTJAM:

We are a system integrator whose mission is to lead customers through their digital transformation journey. We help them adopt leading cloud technologies and we create tailor-made solutions that boost their business.

## WHAT WE OFFER

Thanks to our competencies, and multi-years experience we help Companies throughout the analysis, implementation and management journey of the new Azure Virtual Desktop infrastructure.

Our methodology starts with a consultative approach with the analysis phase of the existing situation. We then move on to the collection of your specific needs followed by our suggestions in order to get the most out of the available technology. The goal is to minimize costs while respecting functionality. The pilot phase allows to implement the identified AVD solution for a group of closely coordinated users.

At the end of the Pilot, we move on to the implementation of the solution, tested in the pilot phase, on the entire selected company employees.

### *What our customers are saying*

“Staying productive regardless of where we work and the tools we use. During the lockdown, within a few hours we were forced to organize work remotely, providing our employees with access to the tools they usually use in the office. Thanks to the introduction of Azure Virtual Desktop, we were able in an agile way to enable users to have a desktop ready for use in a short time.”

– CIO, Italian Energy Company

# Why Azure?

## Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

## Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

## Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

## Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
