Automatically Meet Compliance & Audit Requirements with Archive One

ABOUT PAPERLESS TRAIL & ARCHIVE ONE

Paperless Trail empowers businesses through people, technology, and innovation. Our solutions automate and digitize your business processes, allowing you to access operational data and enabling recordkeeping policies to comply, regulate, and control. Archive One is a cloud-based document management solution that specializes in the healthcare industry, as well as manufacturing, finance, BPO, and human resources.

WHAT WE OFFER

AUDIT + COMPLIANCE

Meet standards of various global Data Privacy Acts, financial regulations, and client-specific checks. File organization enables easy location for audits and automatic compliance report generation.

Hybrid-based document management solutions assure the security and validity of the audit and compliance components of Archive One.

AI POWERED MANAGEMENT

Archive One provides secure and flexible document management. With pretrained artificial intelligence models, machine learning, and optical character recognition.

Azure's power to facilitate the build of resilient apps like Archive One, with automatic operating system updates and geo-redundant storage – Archive One's customers have peace of mind knowing their data and documents are safe.

WHAT OUR CUSTOMERS ARE SAYING

Our office is paperless, thanks to Archive One! What I like about the software is their simple and clean user interface for managing all the digital assets of the company. This is one of the reasons why we awarded the document management system project in the first place. I did not find anything not to like about the software. It keeps on improving with each version. Overall, Archive One is one of the most powerful and affordable document management solutions available in the market today. The developers have gone from local to international standards in just a few years.

Microsoft Azure

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.

KEY USE CASES

WFR

APPLICATIONS

Build anything from lightweight websites to multitier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on georedundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible, enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted on Microsoft Azure.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection

WHY AZURE

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your onpremises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
