

# Trusted Access

Duo ensures only Trusted Users and Trusted Devices can access Every Application.

**Duo's Trusted Access platform is a holistic security solution that reduces your risk of a data breach caused by compromised credentials, known vulnerabilities and/or exploits.**

Using two-factor authentication, Duo verifies your users' identities. Then, Duo checks your users' devices for out-of-date software, missing security features and certificates, enabling you to enforce device access policies to block any risky or untrusted devices.

Finally, Duo grants your users access to only the applications you want them to access, while giving them simplified access to their on-premises and cloud applications with secure single sign-on.

# Trusted Users

## Verify your users' identities with two-factor authentication:

- Easy-to-use authentication app, Duo Mobile allows for easy one-tap login via Duo Push
- Other methods include U2F, SMS passcodes, mobile OTP, phone callback & security tokens
- Works with various identity providers (AD, OneLogin, Okta, Ping) through multiple authentication protocols (LDAP, SAML, OIDC)
- Easily provision users, and automate management with Admin APIs
- Vulnerability assessments using Duo's phishing simulation tool

## Enforce user access policies:

- Block logins based on IP or countries
- Block users on anonymous networks, like Tor

## Authentication Methods to Support Every User

Duo Mobile

Soft Token

SMS

Phone Callback

Hardware Token

U2F Token

# Trusted Devices

## Check the security health of all your users' devices, including:

- Out-of-date operating systems, browsers or plugins
- Enabled security features, like screen lock
- Rooted or jailbroken status
- Trusted or not based on certificates

## Enforce device access policies:

- For corporate-owned vs. personal devices
- Control what devices can access apps based on device certificates
- Block, notify and restrict access of users with risky devices
- Prompt users to update their own devices

# Every Application

## Secure access to any application:

- Integrate with on-premises apps like RDP, SSH, UNIX & more
- Secure VPNs & remote access gateways like Cisco, Juniper, etc.
- Native support for protecting all cloud apps like Office 365, Salesforce, AWS & more
- Protect federated cloud apps
- Allows users to connect to on-premises web apps without a VPN

## Enforce application access policies:

- Control which internal apps are accessible by remote users
- Provide a single web portal to access on-premises and cloud-based applications with Duo's secure single sign-on (SSO)

## Protect Every Application

...and many, many more.

**Duo makes security painless, so you can focus on what's important.**

# Our Mission is to Protect Your Mission.

You have your own mission to fulfill – and managing security shouldn't stand in your way. Put your passion into your business, and trust the experts at Duo to secure it.

## Duo builds security for people.

In this new world, people-centric security is the only effective security. That's why we designed our security solution to work with your technology, people and their devices.

**We're more than a security company.  
We're a Trusted Access company.**

“Duo gives us confidence that access to our cloud-based systems is controlled, locked-down, and verifiable.”

David Root  
Root Logistics

“Duo Security has greatly simplified the management of two-factor access, allowing us to focus on more strategic initiatives.”

Kevin Shanahan  
Sirius Computer Solutions

Duo Security makes security painless, so you can focus on what's important. Duo's scalable, cloud-based Trusted Access platform addresses security threats before they become a problem.

Thousands of organizations worldwide use Duo, including Facebook, Toyota, Panasonic and MIT. Duo is backed by Google Ventures, True Ventures, Radar Partners, Redpoint Ventures and Benchmark. Duo is located from coast to coast and across the sea.
