SAS Grid Cloud Migration.
Discovery Approach

T1A

Iterations

Interviews
Two ~90 minute interviews for each department or area
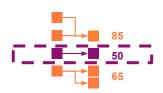

Script Inventory
Capture business use case, sources, targets, interdependencies etc.

T1A SAS Crawler
Inventory validation and identify gaps through automated scans of scripts and logs

Data Flows
Visualize data flows to by source and target. Group & summarize with data dictionary

85
50
65

Score Complexity
Identify and quantify groups of data flows the easiest to migrate

Migration Plan + Roadmap
Review recommended migration strategies by department (~90 min) & cross-departmental roadmap. Interconnect with IT architecture activities

| Capture | Analyze | Score & Prioritize |
