To disrupt you must transform
Mid-market companies need to build agile finance functions built on precision, advanced intelligence, and speed to help the business grow.

What you might be thinking about
— How does the finance function need to change to enable business agility?
— How do I leverage robotics, automation, and intelligence to get more value from my data?
— How do I provide the insight and control to oversee wider innovation and transformation?
— How do I help my people embrace the change?

Focus on the business
KPMG Powered Finance, enabled by Microsoft Dynamics 365 for Finance and Operations, is an integrated approach fueled by business process and technology accelerators that enable rapid adoption of Microsoft Dynamics 365 for Finance and Operations.

And, integration with your existing Dynamics 365 applications enables users to quickly deliver value to the business across manufacturing, supply chain, retail, and finance.

It’s not what you put into the cloud that matters, but what you get out of it.
— A jump start to your digital transformation
— Immediate access to leading practices and processes
— Validated solutions with proven real-world usability
— Reduced implementation risks and enhanced ROI
— High-touch change management and employee experience
— A solid platform for continuing evolution and progress

KPMG – by the numbers

600+ Joint clients
2,500+ Microsoft professionals
1,350 Dynamics certified resources
$100M+ KPMG global powered enterprise investment

I was impressed by KPMG’s performance and attention during our IT transformation and ERP transition to Microsoft Dynamics. I would recommend KPMG. Together, we have found innovative solutions.

— A global manufacturer of electronic audio equipment
**Why KPMG and Microsoft?**

Together, KPMG and Microsoft deliver a pre-configured cloud solution driven by trusted operating models based on decades of KPMG experience working with mid-market organizations in all industries.

We deliver digital transformation enabled by Intelligent Automation, artificial intelligence, cognitive, machine learning, Internet of Things, augmented reality, predictive analytics and cyber risk across the 3 Microsoft clouds – Dynamics 365, Office 365 and Azure.

The bottom line? Faster implementation, user adoption, and time to value while reducing costs and risk.
