# Azure Virtual Desktop (AVD): Practical, flexible & safe - this is how you design your modern workplace

ABOUT APPSPHERE AG:

AppSphere implements mobile and future-proof IT workplace concepts, solutions, and support for transforming business processes. We provide a holistic approach and long-standing expertise in creating the next-generation workplace.

What is Azure Virtual Desktop (AVD)?:

AVD is a service that revolutionises desktop and app virtualisation. With easy management, multi-user capability in Windows 10, optimisations for Office 365 ProPlus, support for Remote Desktop Services (RDS) environments, and built-in security and compliance features, AVD is becoming one of the most significant services for businesses.

WHAT WE OFFER

You want to relieve your own infrastructure, or want to build a more flexible system in which you can concentrate on the essential? Take the chance and choose an easy entry into the cloud.

In our **AVD 1-day Quick-Start Workshop**, we will show you how to virtualize your workplaces, which requirements are necessary for this and how you can enable your employees to work from anywhere on all end devices.
- workshop based on your individual requirements
- Development of a PoC for the set-up of your AVD
- incl. test access for your entire team

AVD offers you these advantages:
- **Immediately ready for use:** You can activate the pre-configured desktop for different end devices in a flash. In this way, you create the optimal working environment with all apps and services - even during onboarding for new employees.
- **Independence for your employees:** Thanks to virtualization in the Azure Cloud, you can use your familiar working environment on all devices. In addition, your employees can work from any location.
- Scalable at any time: Add new devices or remove those you no longer need. By using the service, you only provide as many systems as you need. This allows you to respond to fluctuating demand or changing staff numbers.
- **High security standards:** Protect your data and ensure compliance with built-in security features. AVD is constantly updated by Microsoft, so your staff and your business can rely on a reliable and secure deployment.
- **Low cost:** Use existing Microsoft licenses to keep costs low and predictable.

Why Microsoft Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1,000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a $1B+ investment in security R&D and 3,500 cybersecurity experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
