

UNLOCK MORE FROM YOUR  
IT PROCUREMENT

# /mercato\*...great platforms, one clear choice

Developing scalable cloud environments, we allow organisations to **work more efficiently and effectively** to ultimately save time and money. Our primary technology platforms have been specifically designed and developed to work seamlessly together...

the result of this collaboration **sets our solutions apart from the rest.**

Makes it easy to benchmark IT purchases against daily trade guide price and stock levels on over 150,000 products from more than 2,500 manufacturers.

It's a CIPS-accredited application that empowers you when negotiating with suppliers.

A **marketplace platform** for e-procurement that enables you to create hybrid business marketplaces for all **products and services**, as stand-alone or part of larger Purchase-to-Pay (P2P) deployments. Progora provides Price Comparison, Supplier Governance, Frameworks and Entitlements, Advanced Product Aggregation, improved Supply Chain Management, and with KnowledgeKube embedded, enables **rapid extensibility** and advanced features such as **Advanced Services Configurability** and **Services Productisation**.

An award-winning **app development platform**. Without having to write code, you can produce enterprise web and mobile apps faster and cheaper than using traditional development methods. Without a doubt, it's the fastest way for business users and IT professionals alike to create, test and deploy apps that run across devices. – **Not only that**, KnowledgeKube is the extensibility platform of choice when rapidly expanding solutions based on our other platforms.

# Proven technology

KnowledgeBus is **proven technology**  
that saves its users up to **24%** on their procurement

Our technology platforms, have been specifically designed and developed to **work seamlessly together**.

Progora offers next generation Sourcing and Spend Management for **Products and Services**, whilst KnowledgeKube adds **Unlimited Extensibility**, such as workflow / process automation, integration and connectivity.

# KnowledgeBus® is feature packed...

## Power Benchmarking

KnowledgeBus is the ultimate web based procurement benchmarker - Analyse stock and costing trends quicker and easier.

## Framework Support

KnowledgeBus comes with full support for framework pricing. Providing best price analysis and comparison, clear visibility of pricing sources and quick access to all products within a framework.

## Integrated Solutions

Our features and services are exposed using industry standard web services, and with add-ins for applications such as Microsoft Word™, Excel™ and connectivity into CRM, ERP and Procurement Systems - The choice is ultimately yours.

## Big Data

Not enough? - KnowledgeBus maintains a product archive in excess of 600,000 products; our system even allows you to supplement data with your own product specific purchasing information with additional export options to Microsoft Excel™ to allow yet further analysis.

## Team Collaboration

Whether you operate an enterprise scale category management structure or work as part of a small group. KnowledgeBus is ideal for IT purchasing teams within organisations of any size.

## Certified Technology

Based on our ground-breaking KnowledgeBus and KnowledgeKube Platforms - arming you with the price information you need to make fully informed procurement decisions, enabling you to secure the best possible IT prices for your organisation.
