

9Spokes Open

Simple, seamless integrations to consented data, all through a single API

Created with developers in mind, 9Spokes Open provides easy integrations through a single API; bringing you closer to your customers through permissioned data intelligence.

With 9Spokes Open you can create incredible products by building a multi-dimensional view of your business customers delivering a fast, flexible, and tailored experience.

Connect your customers' business apps to build a rich, always-updating data source, ready to pull from when you need it.

Bolster business intelligence through usable information (calculated metrics) and knowledge (machine learning and AI-powered analytics).

Equipped with permissioned customer data, you'll uncover actionable insights and generate business intelligence.

What's great about our 9Spokes Open solution, in short:

Reduces processing costs by automating data collection and speeding up decision making for loan applications (+ more); and mitigate credit risks by maintaining a connection to your customers' data.

XX

Available connections – number always growing bla bla.

XX

Implementation timeframe and hint about compelling price or no. API calls available

XX

User on our own data product, providing us advantage in data fluency.

3

Levels of accessible data, a step above raw data, we offer usable information.
