

You want to relieve your own infrastructure, or want to build a more flexible system in which you can concentrate on the essential?

Take the chance and choose an easy entry into the cloud.

Challenges

Provide the Right Performance Always Up To Date

- Providing your own infrastructure according to the requirements of the users is a great challenge

Daily Pain Points of IT Departments

- Recurring manual work
- Updates and upgrades
- New and changing requirements and tools

Ideal Solution

Best User Experience in Citrix Sessions

- No difference for the user if he is mobile or got a thin client
- Multi media applications and changing requirements are no longer an obstacle

Free Up Your Work Environment

- Share documents and work together no matter where you are
- Sign in and get started like how you left it

Desired Outcomes

Improve Stability And User Experience

- Centrally deploy Apps on Citrix to guarantee consistent versions for all clients
- Use the georedundant, high-availability of Azure

Focus on The Essential and Be Flexible

- Just take care of the positive effects that you can achieve with the applications
- Manage the workplace for thousands of users easy and flexible wherever you are

Choose The Best of Both Worlds: Citrix on Azure

With the growing demand for companies in global commerce, systems must also become more flexible and secure. In order to make the growing challenges for IT manageable, it is possible to combine the positive aspects from both worlds: Cloud and Citrix.

An easily controllable and monitorable infrastructure that can nevertheless grow flexibly and is globally available. Thanks to its long-term expertise and experts within the Microsoft and Citrix area AppSphere developed solutions and procedures to overcome those challenges. The company offers customized solutions in order to enable companies to realize an optimized deployment of a "ready to use" Citrix environment on Azure.

Choose flexibly between different levels of cloud usage so that you have the power of choice of your individual deployment at any time.
