Choose the best of both worlds: Citrix on Azure

Whether you want to relieve your own infrastructure or build a more flexible system that enables you to concentrate on the essentials, you can make the leap while choosing easy entry into the cloud.

CHALLENGES

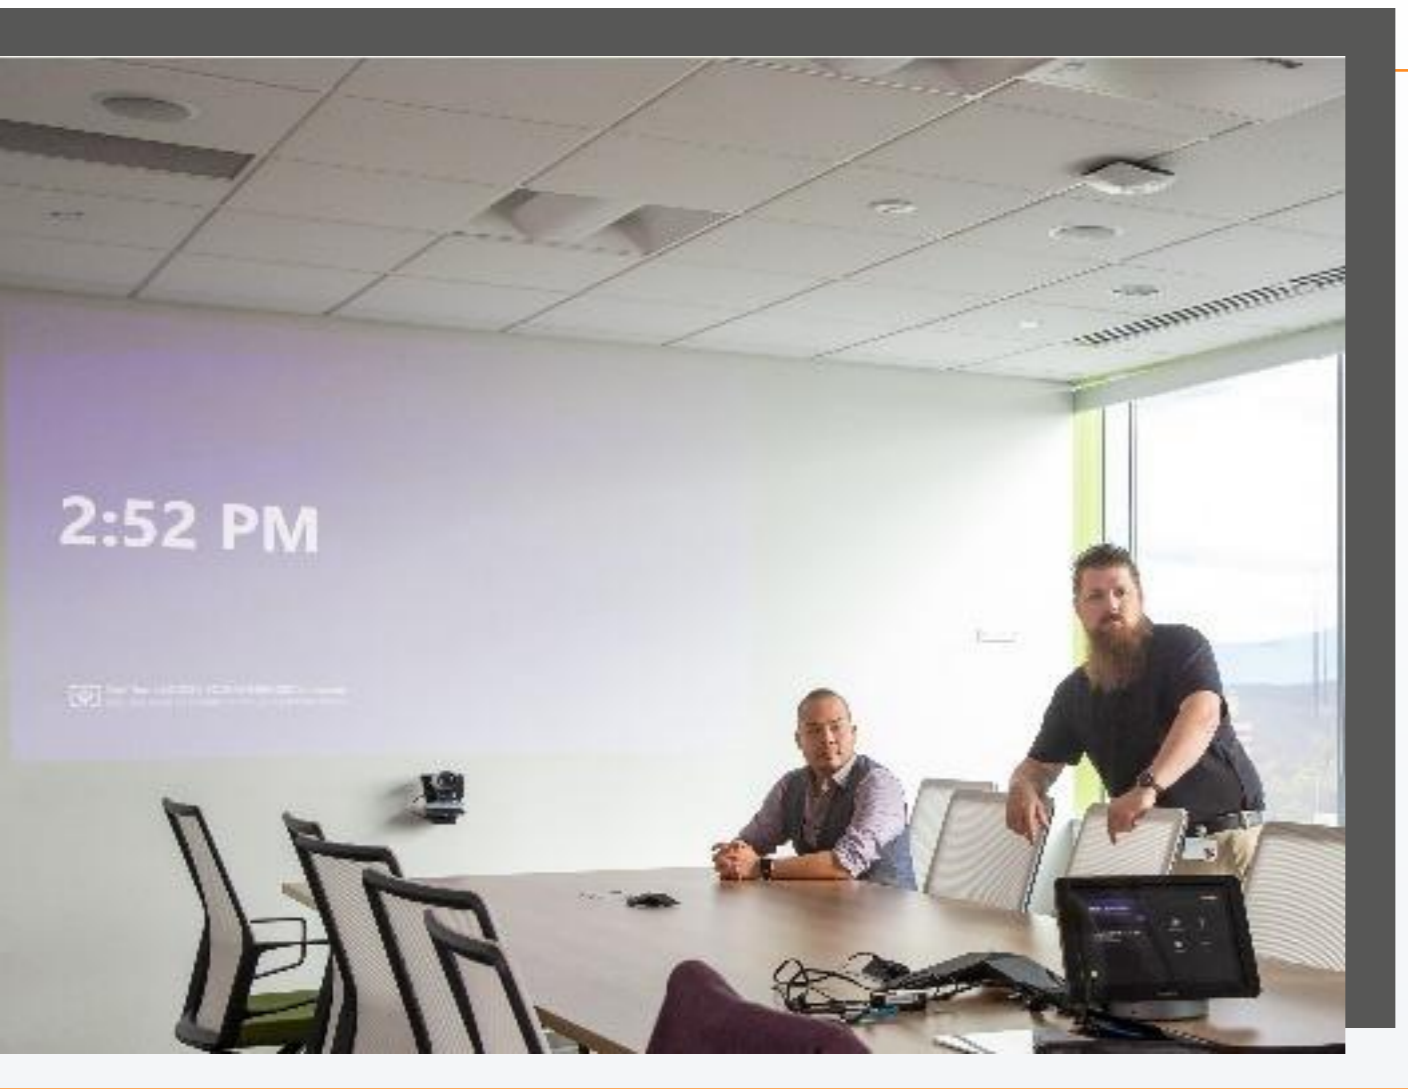

Technological demands are growing for modern companies, and their systems must become more flexible and secure. By combining the Microsoft Azure cloud and Citrix, businesses can make IT departments' growing challenges more manageable.

IDEAL SOLUTION

Businesses want an easily controllable and monitorable infrastructure that's globally available, can grow flexibly, and can be tailored and modified for individual deployments at any time.

DESIRED OUTCOMES

AppSphere offers customized solutions to enable companies to realize an optimized deployment of a "ready to use" Citrix environment on Azure.

Citrix on Azure

Choose flexibly in cloud usage levels and customize your individual deployment at any time.

1

Extend your infrastructure

Get what you need at any given time without long calculations and purchasing processes.

2

Let others do the 'boring' part

Focus on your core business and let others manage recurring tasks automatically.

3

Improve stability and user experiences

Benefit from all the advantages of centralized deployments and choose the performance your users need.

AppSphere AG's XenApp, XenDesktop & Microsoft Azure

Get all the benefits of Citrix XenApp and Citrix XenDesktop, combined with the power of Azure.

Performance and availability

Choose the performance and availability you need for your applications and easily modify them whenever necessary.

Universal availability

Install your apps easily and securely on any device, anywhere in the world.

Pay only for what you need

Use your preferred environment to manage your Citrix infrastructure and scale up or down automatically on demand to reduce costs.

Customer success: The Modern Workplace transformation

"With AppSphere, we have a committed partner on our side. We trust the experts of AppSphere and appreciate how they lead and support us reliably with our major project: the migration to Azure." —Frank Poranski, Infrastructure Division Manager, COMPANY

Seamless rollout and delivery

New versions of Microsoft 365 and other applications were quickly rolled out overnight within the centralized Citrix environment.

Consistent and secure devices

The client obtained a centrally deployed Microsoft 365 implementation on Citrix to guarantee consistent versioning for user types and higher productivity across the board.

Streamlined costs and optimized infrastructure

The client enjoys a modern and scalable infrastructure and simplified updates. It has also eliminated hardware purchasing cycles, replaced by a usage-based payment model.

Let's embark on your cloud journey together
